HISTORICAL

On October 31, 1754, Letters Patent were issued incorporating THE GOVERNORS OF THE COLLEGE OF THE PROVINCE OF NEW YORK IN THE CITY OF NEW YORK IN AMERICA and providing for the establishment of a College to be known as King's College "for the Instruction and Education of Youth in the Learned Languages and in the Liberal Arts and Sciences." The conclusion of the announcement issued in the same year reads: "A serious, virtuous, and industrious Course of Life being first provided for, it is further the Design of this College to instruct and perfect the Youth in the Learned Languages, and in the Arts of Reasoning exactly, of Writing correctly, and Speaking eloquently; and in the Arts of Numbering and Measuring, of Surveying and Navigation, of Geography and History, of Husbandry, Commerce, and Government; and in the Knowledge of all Nature in Heavens above us, and in the Air, Water, and Earth around us, and the various Kinds of Meteors, Stones, Mines, and Minerals, Plants and Animals, and of every Thing useful for the Comfort, the Convenience, and Elegance of Life, in the chief Manufactures relating to any of these things: And finally, to lead them from the Study of Nature, to the Knowledge of themselves, and of the God of Nature, and their Duty to Him, themselves, and one another; and every Thing that can contribute to their true Happiness, both here and hereafter." The educational work of the College was at once begun under the presidency of Dr. Samuel Johnson with a class of eight students and the first Commencement was held on June 21, 1758. The first college building, erected on a portion of the 'King's Farm', at what is now the corner of Park Place and Church Street, was completed in 1760. The Revolutionary War, during which this building was taken for military purposes, compelled a suspension of activities. King's College numbers among its students and graduates Alexander Hamilton, John Jay, Robert D. Livingston, Gouverneur Morris, and John Stevens.

In 1784, the Legislature of the State of New York passed an act incorporating the 'REGENTS OF THE UNIVERSITY OF THE STATE OF NEW YORK', vesting the property of King's College in the Regents, and changing the name of the College to Columbia College. In 1787, this act was repealed, and an act was passed, confirming the Royal Charter of 1754 and vesting the property and franchises of King's College in "The Trustees of Columbia College in the City of New York."

In 1810, the charter was again amended in certain particulars at the request of the Trustees, and re-enacted, but the corporate title remained the same until 1912 when by order of the Supreme Court of the State of New York it was changed to 'The Trustees of Columbia University in the City of New York.' In 1897 the University removed from Forty-ninth Street and Madison Avenue, where it had been situated since 1857, to its present location on Morningside Heights.¹

BUILDINGS AND GROUNDS

The general plan of the buildings of the Corporation on Morningside Heights comprises two groups, one of which occupies the site on the northerly side of 116th Street, extending to 120th Street, and the other, the site on the southerly side of 116th Street, extending to 114th Street, bounded on the east by Amsterdam Avenue, and on the west by Broadway.¹

The UNIVERSITY LIBRARY, erected 1895-1897, the gift of Seth Low, LL.D., of the Class of 1870 and President of the University from 1889 to 1901, is the central feature of the buildings comprising the northerly group which together form a large quadrangle. This group includes on the east: EAST HALL, which contains several of the administrative offices of the University; KENT HALL (205 ft. x 53 ft.), erected in 1910 from funds largely provided by Charles Bathgate Beck of the Class of 1877, College, and 1879, Law, occupied by the School of Law and the Faculty of Political Science; PHILOSOPHY HALL (145 ft. x 57 ft.), erected in 1910, the gift of an anonymous donor, occupied by the Faculty of Philosophy; ST. PAUL'S CHAPEL (140 ft. x 82 ft. x 112 ft., with 1,000 sittings), erected 1904, the gift of Olivia E. P. Stokes and Caroline Phelps Stokes as a memorial to their parents; AVERY LIBRARY (150 ft. x 57 ft.), erected 1911, the gift of Samuel P. Avery, containing the Avery Architectural Library and the School of Architecture; and FAYERWEATHER HALL (150 ft. x 57 ft.), erected in 1896 from the bequest of Daniel B. Fayerweather, occupied by the departments of physics and astronomy. On the north, the group further includes: SCHERMERHORN HALL (205 ft. x 80 ft.), erected 1896, the gift of William C. Schermerhorn of the Class of 1840, occupied by the departments of geology, mineralogy, botany, and zoology; the unfinished UNIVERSITY HALL, occupying the central position on the northern boundary of the campus, which contains the offices of the Bursar, Registrar, Dean of the Graduate Schools, Director of University Admissions, and Director of Summer Session and Extension Teaching, and, next to the LIBRARY, the largest of the University buildings, containing the Gymnasium, the power plant, which provides light, heat, and power to all of the buildings, and the University Commons; and HAVEMEYER HALL (205 ft. x 80 ft.), erected 1896, the gift of the family of Frederick Christian Havemeyer, occupied by the School of Chemistry. On the west the northerly group includes: the SCHOOL OF ENGINEERING building (150 ft. x 57 ft.) erected 1896, occupied by the departments of civil, electrical, mechanical, and highway engineering; EARL HALL (99½ ft. x 58 ft.), erected 1900, the gift of William Earl Dodge, the home of the religious, philanthropic, and social interests of the students; the SCHOOL OF MINES building (145 ft. x 57 ft.), erected 1904, the gift of Adolph Lewisohn, used for mining and metallurgy; and the FACULTY CLUB, a building like EAST HALL, acquired by the University at the purchase of the site.

The southerly group of buildings, occupying the ground lying immediately in front of the LIBRARY, popularly known as South Field, includes, on the east: HAMILTON HALL (205 ft. x 53 ft.), erected 1906, the gift of John Stewart Kennedy, the home of Columbia College; and the two residence halls, HARTLEY HALL and LIVINGSTON HALL, both erected 1904. On the west, the group includes the SCHOOL OF JOURNALISM (205 ft. x 53 ft.), erected 1912, provided by the gift and bequest of Joseph Pulitzer; and a third residence hall, FURNALD HALL, erected 1913.

The University Library is of Indiana limestone. The other buildings, in conformity to the general design, are constructed of overburned brick and limestone, set, as is also the Library, upon a base of granite. A model of all the University buildings (20 ft. x 35 ft.), now existing and as projected, and showing the buildings in detail and in their relation to each other, is on view in the basement of Kent Hall.

¹ For detailed description of the buildings and grounds of the University see *An Official Guide to Columbia University* (pp. ix + 130). \$.25. Columbia University Press, Lemcke and Buechner, New York, Agents.

To the east of the northerly group of buildings, in the block bounded by Amsterdam Avenue, Morningside Drive, 116th and 117th Streets, the property of the University, are the CROCKER RESEARCH LABORATORY, the greenhouses belonging to the departments of botany and agriculture, and the RESIDENCE OF THE PRESIDENT OF THE UNIVERSITY; and on the north side of 117th Street the COLUMBIA HOUSE, the gift of Edward D. Adams, and the MAISON FRANÇAISE, the gift of A. Barton Hepburn, as a center of French interests in the University.

Barnard College is situated on Broadway, immediately west of the University site, and occupies the land extending from 116th to 120th Street. The buildings comprise MILBANK HALL (119 ft. x 65 ft.) and BRINCKERHOFF HALL (166 ft. x 55½ ft.), both erected 1896, the gifts, respectively, of Mrs. A. A. The buildings of Teachers College occupy the block between 120th and 121st Streets, directly north of the University site. They consist of the MAIN BUILDING (169 ft. x 132 ft.), erected 1894; the adjoining MILBANK BUILDING (146 ft. x 52 ft.), erected 1897; the MACY MANUAL ARTS BUILDING (145 ft. x 74 ft.), erected 1896; the HOUSEHOLD ARTS BUILDING (153 ft. x 57 ft.), erected 1909; and the THOMPSON BUILDING (110 ft. x 84 ft.), erected 1904. The HORACE MANN SCHOOL (202 ft. x 100 ft.), erected 1901, the school of observation of Teachers College, forms a constituent part of the group on the Broadway side. WHITTIER HALL (202 ft. x 100 ft.), erected 1901, adjoining Teachers College on the east, is the residence hall for women students and officers. In addition to this group of buildings there are the SPEYER SCHOOL (115 ft. x 49 ft.), at 94 Lawrence Street, erected in 1902 as a school of observation and experiment, and the HORACE MANN BOYS' SCHOOL (173 ft. x 60 ft.), a country day school for boys, erected in 1914, at 246th Street, west of Broadway.

Vanderbilt; the SLOANE HOSPITAL FOR WOMEN (145 ft. x 98 ft.), erected 1886-1911, the gift of Mr. and Mrs. William D. Sloane.

The COLLEGE OF PHARMACY (75 ft. x 100 ft.), erected in 1894, is in West 68th Street, between Broadway and Columbus Avenue.

The entire University occupies 50,629 acres of ground in New York City, and has, in addition, a Summer Camp of Surveying and Geodesy, covering 585 acres, in Morris, Connecticut.

ORGANIZATION

The title to all corporate property is vested in a board of twenty-four Trustees, whose term of office is for life, and who form a self-perpetuating body, exercising the power of appointment as to all officers of instruction and administration and general oversight and control of the affairs of the University. In 1909 provision was made for the nomination by the Alumni of six of the twenty-four Trustees.

THE PRESIDENT has charge of the educational administration of the University and is Chairman of the University Council and of every faculty and administrative board established by the Trustees. The Treasurer of the corporation elected by the Trustees

has charge of the financial administration of the University. The other principal administrative officers are the Deans of the several faculties and the Directors of the Summer Session and Extension Teaching, and of the Schools of Architecture and of Journalism, who under the general supervision of the President have immediate charge of the educational work of the University, the Provost of the University, the Librarian, the Chaplain, the Comptroller, the Secretary of the University, the Registrar, the Bursar, and the Superintendent of Buildings and Grounds.

THE UNIVERSITY COUNCIL is a representative body consisting of the President, the Deans, certain other administrative officers, and two members elected from each of the several faculties. Subject to the reserved power of control by the Trustees, it is the function of the Council (*a*) to control the award of the higher degrees, to secure the correlation of courses with a view to increase the efficiency and to enlarge the range of University work, to encourage original research, and to adjust all questions involving more than one faculty; (*b*) to make recommendations, both to the Trustees and to the several faculties, concerning the educational administration of the University, and to advise the President upon such matters as he may bring before it; (*c*) to appoint all Fellows and University Scholars and, within the limits of the Statutes, to make rules for their government.

THE FACULTIES of the University are composed of the members of the corps of instruction of professional rank. It is the function of the Faculties (*a*) to fix the requirements of admission, the program of studies, and the conditions of graduation; (*b*) to establish rules for ascertaining the proficiency of students, and for the assignment of honors; and (*c*) to fix the times of graduation. The Faculties, in their turn, are made up of various Departments of Instruction, which in the case of larger Departments have an organization of their own under an administrative head. For purposes of administration the Departments are further grouped together in a number of Divisions.

SCHOOLS AND COLLEGES

The Schools and Colleges composing the University are as follows:

COLUMBIA COLLEGE, the oldest part of the University and in a sense the mother of the rest, offers a program of studies leading to the degree of Bachelor of Arts. Emphasis is placed upon the quality of the student's work rather than upon the time spent in residence, and this combined with the close coordination of the work of the Summer Session and Extension Teaching with that of the College, makes it possible for a well-prepared candidate to complete the requirements for the bachelor's degree in three years. The program provides not only for those students who wish to devote their entire time to undergraduate work, but for those who desire during their collegiate residence to prepare themselves for advanced standing in some professional course of study. As a preliminary to any professional courses the University strongly recommends at least two years of collegiate work, and candidates for professional degrees who are not already college graduates are advised to take advantage of the opportunities offered through Columbia College for a combination of general and professional studies which will lead to the bachelor's degree, in addition to a professional degree in law, medicine, mining, engineering, chemistry, or architecture, in six years.

BARNARD COLLEGE, founded in 1889, is a separate corporation and has separate buildings. As an undergraduate college for women, however, it bears the same relation to the educational system of Columbia University as does Columbia College for men. The requirements for admission and the standard of scholarship are of the same grade. The degree of Bachelor of Arts is conferred upon its graduates by the University on the recommendation of the Faculty of Barnard College.

THE GRADUATE FACULTIES of the University, consisting of the coordinated faculties of Political Science, Philosophy, and Pure Science, offer advanced courses of study and opportunities for original research leading primarily to the non-professional degrees of Master of Arts and Doctor of Philosophy:

THE FACULTY OF POLITICAL SCIENCE, established in 1880, in history, economics, social science, government, public law, and comparative jurisprudence.

THE FACULTY OF PHILOSOPHY, established in 1890, in philosophy, education, psychology, anthropology, Greek and Latin, English, comparative literature, the Germanic, the Romance, the Slavonic, and the Oriental languages.

THE FACULTY OF PURE SCIENCE, established in 1892, in mathematics, astronomy, physics, chemistry, mineralogy, geography, geology, zoology, botany, physiology, anatomy, bacteriology, biological chemistry, pathology, and engineering.

THE COLLEGE OF PHYSICIANS AND SURGEONS, founded in 1807, offers courses in the principles and practice of medicine and surgery, leading to the degrees of Bachelor of Science in Medicine and Doctor of Medicine.

THE SCHOOL OF LAW, established in 1858, offers courses of three years and of one year in the principles and practice of private and public law, leading to the degrees of Bachelor and Master of Laws respectively.

THE SCHOOL OF MINES, founded in 1863, offers a three years' course of special professional study in mining and metallurgical engineering, leading to the degrees of Engineer of Mines and Metallurgical Engineer.

THE SCHOOL OF ENGINEERING and THE SCHOOL OF CHEMISTRY, set off from the School of Mines in 1896, offer a three years' course of special professional study in civil engineering, sanitary engineering, electrical engineering, mechanical engineering, and chemical engineering, leading to the degrees of Civil Engineer, Electrical Engineer, Mechanical Engineer, and Chemical Engineer.

TEACHERS COLLEGE, founded in 1888 and chartered 1889, was included in the University in 1898. It is a separate corporation, but takes academic rank in the University system as a professional school for teachers. It offers through the Faculty of Education, a course of study leading to the degree of Bachelor of Science in Education and graduate courses in school administration and in secondary, elementary, and kindergarten education, leading to the Teachers College diploma and the doctor's and master's degrees. Through its faculty of Practical Arts the College offers (a) a four-year program of collegiate study, based on four years of high school work, leading to the degree of Bachelor of Science in Practical Arts, and uniting liberal education in the fundamental cultural subjects with technical training in household arts, fine arts, industrial arts, music, physical education, and nursing and health; (b) two-year professional curricula in each of the above technical subjects, based on two years of collegiate study and leading to the Teachers College diploma and to the degree of Bachelor of Science in Practical Arts.

THE COLLEGE OF PHARMACY is, similarly, a separate corporation. It offers University courses leading to the degrees of Pharmaceutical Chemist, Bachelor of Science in Pharmacy, and Doctor of Pharmacy.

THE SCHOOL OF JOURNALISM, founded in 1912 through the gift of the late Joseph Pulitzer, offers courses in letters, science, and practical Journalism leading to the degree of Bachelor of Literature in Journalism.

THE SCHOOL OF ARCHITECTURE, founded as a department in 1896 and as a separate School in 1914, offers courses of study leading to the degree of Bachelor of Architecture, and advanced courses leading to the degree of Master of Science.

THE SCHOOL OF BUSINESS, organized in 1915, offers courses of study and technical and professional instruction in accounting, finance, and various branches of business leading to the degree of Bachelor of Science in Business, and advanced courses leading to the degree of Master of Science.

THE SCHOOL OF DENTISTRY, organized in 1917, offers courses in Dentistry and Oral Hygiene leading to the degree of Doctor of Dental Surgery.

The University maintains a SUMMER SESSION, of six weeks' duration, in which are offered courses that are accepted in partial fulfillment of the requirements of certain academic degrees and diplomas.

Through its system of EXTENSION TEACHING, the University offers to men and women, especially to those engaged in teaching, who can give only a portion of their time to study, an opportunity to pursue subjects included in a liberal education and to take courses, if they so desire, toward a diploma or an academic degree.

GENERAL REGULATIONS

STATUS OF STUDENTS

A student may enter Columbia University as either:

1. A matriculated student, accepted by the University as having fulfilled the preliminary qualifications for candidacy for a degree, certificate of proficiency, or diploma. A period of regular attendance upon all stated academic exercises amounting to at least one academic year must be completed by each such candidate; or

2. A non-matriculated student, permitted to attend such courses as he may be qualified to take, but not regarded as a candidate for a degree, certificate of proficiency, or diploma.

In the *Announcement* of each faculty will be found the conditions governing admissions to courses under that faculty.

Under the Statutes every student is admitted subject to the disciplinary powers of the University authorities. The President is empowered to administer discipline and to authorize the Deans of the several faculties to do so on his behalf.

Students prevented by conscientious scruples from complying with academic requirements which may be fulfilled only upon days set apart by their church for religious observance, should make application to the appropriate authority for equitable relief.

REGISTRATION

Before attending any University exercise each student must register, *i. e.*, must present himself in person to furnish the information necessary for the University records and to file a statement of the courses he is authorized to pursue. The central office of the Registrar, University Hall, and the offices at the College of Physicians and Surgeons and the School of Dentistry, 437 West 59th Street, at the College of Pharmacy, were open for registration on September 17 to September 24, 1919; and on January 31 to February 3, 1920. New students were permitted to register on the day following each of these periods. Those unable to complete their registration may file a provisional statement within the statutory period. Students registering late are charged an additional fee of five dollars and are held accountable for absences thus incurred. Registration cannot be completed until the fees for the Session have been paid.

Students holding fellowships or scholarships are required to register not later than the date specified in the Academic Calendar; failure to do so may be considered as vacating the fellowship or scholarship.

The requirements for graduation may be completed at any time during the year, but diplomas are issued only at Commencement and under date of the last Wednesday in February and October, respectively.

Withdrawal. An honorable discharge is granted to any adult student in good standing who may desire to withdraw from the University; a minor must submit the written assent of his parent or guardian. Students withdrawing from the University are required to notify the Registrar. No application for a return of fees can be considered unless written notice be given at the time of withdrawal. The Dean of any faculty may, for reasons of weight, grant a leave of absence to a student in good standing.

FEES

All fees are payable semi-annually in advance, and no reduction is made for late registration. Under the regulations, the privileges of the University are withheld from any student delinquent in the payment of his fees.

The fees to be paid by students are subject to change at any time in the discretion of the Trustees.

Students who were matriculated as candidates for a degree prior to July 1, 1915, may be permitted to pay for tuition for courses taken to fulfill the requirements for that degree at the rate effective during the academic year 1915-1916.

Late Registration. For the ultimate date for the completion of registration without the payment of the additional fee, see the Academic Calendar.

Late Application. For the ultimate date for filing an application for admission, a deficiency or a special examination, or for a degree, without the payment of the additional fee, see the Academic Calendar.

Deficiency and Special Examinations. An examination to remove a deficiency in course or in entrance requirements, or an examination at an unusual time, involves the payment of the additional fee.

When a rebate is allowed for the discontinuance of courses or withdrawals from the University, such rebate will be reckoned from the day upon which the Registrar receives notice from the student.

Summer Courses in Surveying, Mining, and Geodesy. Students taking courses in Surveying and Geodesy in the Summer Session at Camp Columbia are required to pay a university fee of \$5 and tuition fees for each course. The university fee is payable but once for each session and allows a student to take any course or courses given during that session for which he is otherwise eligible. The tuition fees are estimated at \$6 per point.

Candidates for admission to advanced standing who attend the Summer Course in Practical Mining are required to pay therefor a fee of \$50.

DEPOSITS

Summer Courses in Surveying. Every student before starting for Camp, and at the same time the fees for the Summer Session in surveying are paid, shall make a deposit at the Bursar's office at Columbia University to meet Camp expenses, *viz.*, board, laundry, charges for drawing material, notebooks, etc.; also to cover any damage to breakage, or loss of instruments or Camp equipment, and transportation of self and baggage from the station to and from the Camp. The Bursar's receipt for said deposit shall be presented to the professor in charge of the Summer Session upon the arrival of the student in Camp.

The amount of the deposit varies with the course or the number of courses taken and is as specified below. Students intending to take two or more courses shall deposit an amount equal to the sum total of the deposits herein specified for the respective courses. A check for the balance of the deposit which shall remain to the credit of the student after his withdrawal from the session will be given to him payable upon application to the Bursar of Columbia University. In case the total charges exceed the deposit the student will be subject to an additional assessment.

The deposit for C.E. 15S shall be \$50; for C.E. 25S, \$50; for C.E. 26S and 26aS, \$25; for C.E. 27S, \$50; for C.E. 28S, \$30; for C.E. 71S, \$35; and for Geodesy 107, \$30.

The deposit for any one survey of Course 15, 25, or 27 shall be \$15.

Apparatus, Supplies, and Keys to Desks and Lockers. A deposit for the use of lockers, keys, apparatus, material, and the like, is required of students in certain schools and courses. At the end of the academic year each student will be credited with those articles which he returns in good order, and the value of those he has injured or broken will be deducted from his deposit. Details may be obtained from the Bursar.

EMPLOYMENT FOR STUDENTS

The University endeavors through the Secretary of Appointments to give to students who need it the opportunity to earn enough for partial support, and to extend assistance in other ways.

Preference is naturally given, in case of a choice of applicants, to those who, as strangers in New York, are not likely to hear of positions through other channels.

No prospective student should come to Columbia expecting to depend entirely or even largely upon the assistance of the University, and every student should be prepared to meet at least the expenses of the first half-year—say, \$400.

Communications relating to above should be addressed to the Secretary of Appointments, Room 316 University Hall.

APPOINTMENTS WORK

The appointments work of Columbia University is divided between two branches: one having headquarters at Columbia University, the other at Teachers College.

The duty of these offices is to assist competent graduates of the University to obtain suitable permanent employment.

Both offices will be glad to be informed promptly of present or prospective vacancies in positions for which college-trained men or women are eligible.

No fee is charged for any services rendered.

The office at Columbia University keeps classified lists of those who wish employment in business, in law offices, along social service or public lines, or in technical branches; also in teaching positions in colleges and universities, except those in Education. Communications relating to above should be addressed to the Secretary of Appointments, Room 316 University Hall.

The Committee at Teachers College keeps classified lists of those who desire administrative, supervisory, and teaching positions in normal, secondary, and elementary schools, kindergartens, and hospitals, and for college and university positions in the teaching of Education; that is to say, for any position specific preparation for which is made in Teachers College. Communications should be addressed to the Chairman of the Committee, Professor M. R. Trabue, or its Recorder, Miss Isabelle L. Pratt.

FELLOWSHIPS, SCHOLARSHIPS, AND PRIZES

(See Table of Contents.)

RELATIONS BETWEEN THE UNIVERSITY AND OTHER INSTITUTIONS

The educational opportunities of students in Columbia University (including Barnard College, Teachers College, and the New York College of Pharmacy) are increased by the close relations of the University with other institutions of instruction and research.

Museum of Natural History. The American Museum of Natural History places its collections at the service of advanced students of Columbia University for the purpose of study and research, and provides them with the necessary facilities for work.

Metropolitan Museum of Art. The Metropolitan Museum of Art admits students of Columbia University on presentation of cards of introduction from the University, and gives them special facilities for the study of the objects in the Museum.

New York Botanical Garden. Columbia University has the privilege of conducting university courses in botany at the New York Botanical Garden and of using its laboratories and floral material, and all courses of instruction given there are open to officers and students of the University without charge. The Director is a member of the Faculty of Pure Science. For a description of the equipment of the Botanical Garden, see the statement of the Department of Botany.

Theological Seminaries. The Union Theological Seminary and the General Theological Seminary, both of which are represented on the University Council, admit students of high standing in the University to certain lectures in their regular or special courses.

Libraries of the Seminaries, for reference, are open to all qualified students of the University. Reciprocal advantages are offered by the University to students of the Seminaries who are qualified to register as candidates for the higher degrees. The General Theological Seminary offers a scholarship to graduates of Columbia College.

The University also enjoys reciprocal arrangements with the theological seminaries in the vicinity of New York: the Jewish Theological Seminary (New York), Drew Theological Seminary (Madison, N. J.), St. Joseph's Theological Seminary (Yonkers, N. Y.), the New Brunswick (N. J.) Theological Seminary, and the German Theological Seminary (Bloomfield, N. J.).

The Director of the New York School of Social Work is a professor in the University, and the same reciprocal advantages for students exist as in the case of the theological seminaries.

Hospitals. Besides the Vanderbilt Clinic and the Sloane Hospital for Women, the general and special hospitals of New York afford important fields for clinical teaching. The College of Physicians and Surgeons is in close alliance with the Presbyterian Hospital, and is strongly represented on the staff of many other institutions, and regular clinical instruction at hospitals is made a prominent feature of the program. In many of these hospitals the fourth-year students are admitted as clinical clerks to serve on the house staff.

Other Institutions. There are close informal relations between the University and the Hispanic Society of America, the Rockefeller Institute of Medical Research, the New York Zoological Garden, the New York Aquarium, and the laboratories at Wood's Hole and Cold Spring Harbor. (For the Libraries of the City, see below.)

THE LIBRARY

The Library contains about 725,000 volumes, exclusive of unbound pamphlets and duplicates, and some 80,000 doctoral dissertations.

Among the notable special collections may be mentioned the Columbiana, 3,500 titles; the Phoenix Library, consisting of 7,000 volumes, the gift of Stephen Whitney Phoenix, of the Class of 1859; the Avery Architectural Library, a collection of about 23,000 volumes relating to architecture and decorative art; the Mary Queen of Scots Library, containing 550 volumes, collected and given by General J. Watts de Peyster; the collection of over 1,200 volumes by and about Goethe; the Immanuel Kant collection of nearly 1,000 volumes; the valuable Townsend Library of National, State, and Individual War Records; the Garden Library, deposited by the Southern Society of New York; the valuable library of the Holland Society of New York, 600 volumes, including the remarkable collection of works of Grotius; the philological library of the late Professor Mortimer Lamson Earle, given by his students and friends, consisting of some 2,500 volumes; the library of Henry Livingston Thomas, late Chief Translator of the Department of State, Washington, given by his son, Dr. William S. Thomas, some 9,000 volumes; the library of the American Mathematical Society, 5,000 volumes; the musical library of Dr. James Pech, consisting of 8,723 pieces; the library of the late George W. Hill, 5,000 volumes on mathematics and astronomy; and a collection of contemporary French literature at the Maison Française. The Library is also the depository for the Reform Club of the City of New York.

Reading-rooms. About 15,000 carefully selected reference books and many of the most important works on all subjects, in standard editions, representing the leading authors in all literatures, are placed in the general reading-room directly accessible to all authorized readers. On the same floor, in the north wing, is the periodical reading-room, where are shelved many bound volumes of periodicals, and the current numbers of government documents and periodicals.

For the convenience of undergraduates of Columbia College, there is in Hamilton Hall a College Study. Five thousand carefully selected volumes have been placed in this room as a reference library.

Connected with the stacks in which are stored the books relating especially to Philosophy, Literature, the Languages, the Sociological and Economic Sciences and History, are twenty special study-rooms, open only to authorized readers, which afford to advanced students and investigators in these fields opportunity to carry on their work in quiet rooms in the immediate vicinity of the literature of the subjects under consideration. The various departments of instruction have special libraries in close connection with their laboratories and lecture-rooms.

The Law Library, the Bryson Library of Teachers College, which is the Educational Library of the University, and the carefully selected reference libraries of Barnard College, the College of Physicians and Surgeons, and the College of Pharmacy, are all available to officers and students of the University. Nearly all of the more private or restricted libraries of the city, such as those of the learned societies, are open to officers and to advanced students introduced by the Librarian of the University.

In the basement of the Library, the New York Public Library maintains a branch of its circulation department. The collection contains about 4,000 volumes and 80,000 additional titles are available through the Interbranch Loan System.

By the courtesy of the trustees of Union Theological Seminary the reading-room of that institution is open to students of the University.

Catalogues. The general catalogue of the Library is a record of all books, with the exception of the special collections in Law and Medicine, in the possession of the University. In addition to this there are catalogues of department libraries located in department reading-rooms, and a union catalogue which is a record, by authors only, of books not possessed by the University which may be found in the Library of Congress, John Crerar Library, Harvard University, and other libraries.

Use of the Library. All officers, students, and graduates of the University have free access to the Library and may draw books for home use. For further information, consult the *Readers' Manual* and *Library Rules*.

Officers of New York University, of the College of the City of New York, of Hunter College, of the Metropolitan Museum of Art, of the American Museum of Natural History, and principals and heads of departments of the New York High Schools, are granted the same Library privileges as are extended to graduates of Columbia University.

Persons of mature years desiring to engage in definite research which cannot be successfully conducted in the Public or other libraries of this city will be given the privilege of using this library in the building, upon filing a satisfactory application, responsibly indorsed. Blank applications will be furnished by the Librarian on request.

The Library is open each week-day (except Labor Day, Thanksgiving, Christmas, New Year's Day, Good Friday, and Independence Day) from 8:30 a. m. until 10 p. m., during the Winter, Spring, and Summer Sessions of the University; and from 8:30 a. m. to 6 p. m. at other times.

BOOK STORE

A University book store is maintained in the basement of the School of Journalism building under the auspices of the Columbia University Press, where officers and students may purchase books and stationery at stated discounts from list prices.

UNIVERSITY COMMONS

The University Commons, in University Hall, is operated under University supervision for the benefit of officers and students.

RESIDENCE HALLS

For Men. There are three University residence halls on South Field, with accommodations for, approximately, 820 men; Hartley Hall, the gift of Mrs. Helen Hartley Jenkins and Marcellus Hartley Dodge, '05, in memory of the late Marcellus Hartley; Livingston Hall, named in memory of Robert R. Livingston, of the Class of 1765; and Furnald Hall, provided for in the will of the late Francis P. Furnald, in memory of his son, Royal Blackler Furnald, a member of the Class of 1901. Each building is ten stories in height exclusive of basement, and 137 feet long by 64 feet wide. They are lighted by electricity and heated by steam, and have telephone and electric elevator service.

The Halls are built of stone and overburned bricks. The floors and partitions are of the reinforced concrete type, and the construction is considered thoroughly fire-resistant throughout.

Hartley and Livingston each contain 300 rooms, the average size of the bedrooms being 8' 4" x 14' 6" and of the studies 10' 6" x 14'. Furnald contains 294 rooms, the average size of bedrooms being 9' 0" x 14' 9" and of the studies 11' 6" x 13' 6". All the rooms have outside light and exposure, and the arrangement permits of flexibility in renting rooms in suites. There are also several double rooms. All ceilings are nine feet high. Each bedroom has a clothes closet and enameled basin with hot and cold running water. The rooms are provided with heavy oak furniture of mission type. There are four shower baths on each floor. All the water used in the Halls is filtered. The entrance for students to each Hall is from the campus, and leads directly into a large assembly room sixty feet square. This room runs up through two stories and has a large open fireplace opposite the entrance. It is furnished in heavy leather-covered oak. At one side of the main entrance is the office of the Hall, and on the other a reception-room. In the basement is space for trunk storage. There are well-equipped infirmaries in each one of the Residence Halls. Rentals range from \$105 for single rooms to \$400 for three-room suites for the academic year of thirty-eight weeks.

The Residence Halls are supervised and controlled by a Council composed of the Comptroller, three University officers, and a representative from each Hall. The Council is assisted by three committees made up of residents in the Halls.

While the Halls are open to all male students of the University, students in Columbia College, in accordance with the desire of the donors, are given the preference in the assignment of rooms in Hartley Hall. Rooms on the third, fourth, and fifth floors of Hartley Hall are reserved for use of College Freshmen only. College Freshmen should make selections from these rooms. A pamphlet containing floor-plans, charges, and the Hall Regulations may be had upon application to the Secretary of the University. Rooms will be assigned in the order of receipt of written applications to be made on a blank provided by the Superintendent of Buildings and Grounds.

For Women. Brooks Hall, the residence hall for Barnard College students, on the north side of 116th Street, accommodates ninety students. Full information in regard to the situation and cost of rooms, the advance of deposit, the charge for electric light, and the residence scholarship is published in a separate pamphlet, to be had on application to the Secretary of Barnard College, or to the Mistress of Brooks Hall, Barnard College, New York City.

Whittier Hall, the dormitory of Teachers College, is situated on Amsterdam Avenue, between 120th and 121st Streets, and has accommodations for 455 women. Inquiries regarding rooms, board, and the like should be addressed to the House Director of Whittier Hall, 1230 Amsterdam Avenue.

Other Accommodations. Besides these dormitories, there are many good boarding-houses and apartments near the University. The careful selection, inspection, and registration of such lodgings have been undertaken, and a card-catalogue of lodgings is kept at the office of the Social Director, Teachers College. Many of the Greek-letter fraternities maintain chapter houses near the University.

PUBLIC WORSHIP AND RELIGIOUS WORK

Service in St. Paul's Chapel, at which attendance is voluntary, is held at noon, every week-day during the academic year, except Saturday, the period from 12 to 12:20 being set aside by the University Council for religious exercises. Service on Sunday, with address by the Chaplain or by a visiting University preacher, is at 4 o'clock. Organ recitals are also frequently given.

The Chaplain holds hours for consultation after daily chapel service and also in the afternoon at Earl Hall. The Chaplain's house is in close proximity to the campus.

Barnard College and Teachers College hold separate services twice a week in their respective chapels.

EARL HALL

Earl Hall, the home of the religious, philanthropic, and social organizations and interests of the University, is open from 8:30 a. m. to 10 p. m. daily to all students without expense, under the direct management of the Secretary of Earl Hall, who is also Secretary of the University Young Men's Christian Association.

The building may not be used for distinctly dogmatic or denominational religious teaching, but all organizations, the objects of which are to promote the religious and philanthropic life of their student members and of the student body at large, have the privilege of using it for their meetings. While the social purposes of the Hall are necessarily subordinated to the other uses of the building, the Secretary desires to promote the same type of informal personal and social intercourse that prevails in a good club. Provision for the regular meetings of student organizations is made on a day-and-hour schedule, without exclusive use of any of the rooms, in the following order: societies the purpose of which is (1) primarily religious; (2) primarily philanthropic; (3) primarily literary; and (4) miscellaneous student organizations.

The Secretary of the Young Men's Christian Association, the Chaplain of the University, and the University Medical Officer, have offices in this building.

MEDICAL ATTENDANCE

The University Medical Officer, Dr. McCastline, has direct supervision of all matters affecting the health of the student body. All cases of illness, especially communicable diseases, must be promptly reported to him. Absence from classes due to illness must also be reported to his office. Dr. McCastline, as University Physician, and the members of his staff hold office hours daily in Earl Hall for consultation with students.

Members of the University who need medical attention at home, and who desire to be advised concerning private physicians, specialists and nursing care, will receive such information upon applying at the office of the University Physician.

STUDENT ORGANIZATIONS

The various student organizations, while self-governing, are subject to the following regulations: The schedules of public contests and performances must be approved by the University Committee on Student Organization; budgets for expenditure are approved and checked by the Comptroller; the University Committee on Athletics, consisting of three graduates, three students, and three University officers adopt and administer rules of eligibility not involving questions of scholarship and govern participation in intercollegiate athletics. Provision is made for the election each year by the student body at large of a Board of Student Representatives. The members for the current year are: C. Shaw, *Chairman*; H. A. Koenig, *Secretary and Treasurer*; L. C. Owen; E. H. Healy; H. Haldenstein; S. Weinstein.

The Columbia University Athletic Association was organized in 1909 for the purpose of formulating and maintaining a general athletic policy at Columbia. The annual dues are \$10.00, entitling members to free admission at all home games and also to the use of the Gould Boat House.

King's Crown is an organization aiming to do for non-athletic activities what the athletic association does for athletics. The annual dues are two dollars, entitling members, among other privileges, to discount from the prices of subscriptions to publications and admission to non-athletic performances.

GREEK-LETTER FRATERNITIES

The following Greek-letter fraternities, given in the order of their establishment, maintain chapters at Columbia University: Alpha Delta Phi; Psi Upsilon; Delta Phi; Delta Psi; Phi Kappa Sigma; Phi Gamma Delta; Phi Kappa Psi; Delta Kappa Epsilon; Zeta Psi; Beta Theta Pi; Delta Tau Delta; Theta Delta Chi; Phi Delta Theta; Delta Upsilon; Sigma Nu; Sigma Chi; Sigma Alpha Epsilon; Phi Sigma Kappa; Alpha Chi Rho; Alpha Sigma Phi; Zeta Beta Tau; Pi Lambda Phi; Phi Sigma Delta; Phi Epsilon Pi; Sigma Alpha Mu; Kappa Nu; Alpha Phi Delta; Phi Beta Delta; Tau Epsilon Phi; Omicron Alpha Tau; Tau Delta Phi; Acacia; Beta Samach.

DIVISIONAL AND DEPARTMENTAL STATEMENTS

INTRODUCTORY

The courses of instruction are numbered in accordance with a plan uniform throughout the University, and attention is called to the following information which the number assigned to a course will in each case indicate.

Odd numbers indicate the Winter Session, even numbers the Spring Session of the academic year. Courses designated 1-2, 23-24, etc., run through the Winter and Spring Sessions beginning in the Winter Session; those designated 4-5, 24-25, etc., begin in the Spring Session. Courses numbered between 1 and 100 are, in general, elementary and may not be offered in fulfillment of the requirements for the higher degrees (Masters, Doctors, and Professional Degrees). Courses numbered from 101-200 are primarily for students who hold a first degree but are open to undergraduates who have completed 64 points (for courses in Law, 94 points), including all prescribed work. In general, no such course may be taken without some elementary training in the same or in some allied subject. Courses from 201-300 are restricted to such graduate students who are qualified to pursue the work to advantage. Seminars are numbered from 301 up. Attention is called to the current *Announcement of the Faculties of Political Science, Philosophy, and Pure Science*, and particularly to the fact that the requirements for the degrees of Master of Arts, Master of Science, and Doctor of Philosophy are based upon subjects, and not upon courses. Students should consult the officers of instruction and administration concerned with regard to their selection of courses before registration.

Credit for courses is given in terms of points. Hours indicated are for a Winter or Spring Session.

Any subject of study not appearing in its alphabetical order may be found through the index.

With the exception of the courses in law and engineering the University is open to women in all of its various branches.

Unless otherwise stated, the number of hours given indicates the hours of classroom work (lectures, conferences, and recitations) per week. When a course involves both class-room work and laboratory or drafting-room work, the former will be indicated by *C* and the latter by *L* and *D* respectively. In courses in medicine, *D* indicates demonstrations. An 'afternoon' implies three hours a day, normally from 1 to 4.

Students should note the distinction between a department and a school. For instance, there are Departments of Civil, Electrical, and Mechanical Engineering and a School of Engineering. The departmental statements which follow have to do only with the giving of the instruction and the opportunities for research in each special branch of study. The information as to the conditions of admission to the courses and the academic credit to be received therefor, will be found under the information relating to Colleges and Schools which follow the Departmental Statements, and in the separately printed *Announcements*.

It is not possible, within the limits of this volume, to give more than the briefest outline of the courses. In the appropriate *Bulletin of Information* published by the University, and distributed without charge upon application to the Secretary, a detailed statement will be found of the scope of each course, the manner of treatment, the courses requisite, and the like.

Besides the usual laboratory equipment in field crops, soils, horticulture, and animal husbandry the department has a seventy-six-foot greenhouse. Soil types of the surrounding region are available for plant tests and analysis. Soils from gardens and farms are tested by students. Special research laboratories, with separate temperature and heat control, are provided in the glass-house laboratory. Land for experimental and demonstration plant-work is located near the glass-house, on the campus. For the graduate work in market surveys many of the industrial plants of New York City furnish unexcelled opportunities.

Equipment. The laboratory facilities of the department are very complete. The large general dissecting-room accommodates from 390 to 546 students, working in groups of five or seven at one table.

The laboratory for advanced morphological research occupies the third story of the anatomical building. Every facility for advanced and research work in morphology is here extended. The established connections of the department furnish abundant human and comparative material, both mature and embryonal. The private library of the Professor of Anatomy is at the disposal of advanced workers.

Museum. Much work has been done in the formation of a Museum of Human and Comparative Anatomy, the ultimate design of which is to present, in as complete a manner as possible, a view of the evolution of the forms of animal life, and of their natural relations both in series of natural groups and in the comparative and relative positions of organs and systems. The collection, both as regards groups and the individual preparations, is designed for the illustration of both elementary and advanced courses.

The second floor of the anatomical building has been furnished throughout with suitable exhibition and demonstration stands. It is the intention of the department to install in this space the portion of the collection most used in the medical courses, thus establishing an undergraduate teaching museum which will both increase the efficiency of the sectional demonstrations and render the material upon which they are based available at all times for study and research.

A study collection of human osteological preparations is so administered as to enable every student to take out the different osteological series and retain them for private study as long as required.

Equipment. The School of Architecture occupies three complete floors in Avery Hall. The provision of rooms for lectures, drawing, drafting, and study is ample, and the drafting-rooms on the upper floor are well lighted and convenient. Two rooms are set aside for the study of books and photographs, and there is a large exhibition room for Design and other current work.

The Avery Architectural Library, consisting of about 25,000 volumes relating to architecture and allied arts occupies the ground floor of the building. It is open to the public daily (except Sundays and holidays) from 9 a. m. to 10 p. m. Its abundance of material is available for purposes of study and illustration in the School.

In addition to this, the School possesses, in its own departmental library, a collection of about 18,000 photographs and several hundred books, a classified library of many thousands of prints and plates, and a large number of original drawings, including examples of architectural draftsmanship from the École des Beaux-Arts at Paris and from many other sources. A collection of about 15,000 lantern slides is in daily use for illustrating lectures on the history and theory of architecture, painting, and sculp-

ture, on ornament and the allied arts, as well as landscape and civic design. The School also possesses a valuable collection of casts for use in the drawing-rooms and for general illustrative purposes. The illustrative material on construction and architectural engineering is also extensive, comprising a large variety of building materials and appliances and a number of structural models specially prepared for the School.

For the advanced study of astronomy proper, there are special facilities including two Repsold measuring machines of the latest type and a large collection of original astronomical photographs, suitable for measurement and reduction. These photographs were made by Gill at the Cape of Good Hope, Rutherford at New York, Donner at Helsingfors, Henry at Paris, Campbell at Mt. Hamilton, etc. Funds are provided for the publication of researches in astronomical photography. (See University Bibliography.)

In addition, there are a number of unmounted instruments, including Lewis Morris Rutherford's famous 13-inch equatorial, with its attachments.

In Havemeyer Hall the Chemical Department is provided with ample space for its museum, lecture-rooms, and laboratories.

There are five chemical lecture-rooms, all fully supplied with apparatus and instruments, the desks being equipped with pneumatic troughs, gas, presseur, exhaust, and electricity. The large chemical lecture-room on the ground floor contains 248 seats.

The Museum of General Inorganic and Organic Chemistry and of the Chemical Arts, a large room occupying the whole left wing of the ground floor, contains the elements and all their more important compounds, inorganic and organic; materials and products illustrating the chemical arts, and numerous models, pictures, and diagrams.

The new William H. Nichols Laboratories for General Inorganic Chemistry and Qualitative Analysis, together with the rooms for instructors and for research, occupy the whole of one floor of Havemeyer Hall. They are fitted up in the most modern and complete way, with all the conveniences required for instruction and investigation.

The Quantitative Laboratory has eighty-eight desks. Attached to the main laboratory is a large, well-equipped balance-room, containing accurate balances, and special rooms for instructors and a limited number of advanced students.

The Organic Laboratory has forty large desks, provided with gas, water, exhaust, and electricity, and has special rooms for balances, pressure ovens, glass-blowing, and combustions.

The laboratory of Physical Chemistry is well equipped with the most recent apparatus adapted to a wide range of experimental work in the branches of heat, light, electricity, etc., as applied to chemical problems.

The Chemical Library in Havemeyer Hall is supplied with an extensive collection of chemical books and journals, and is open from 9 a. m. to 5 p. m.

The Department of Chemistry at Barnard College has laboratories well equipped with every facility for the proper study of the subjects offered. The desks have water, gas, and electricity. There is a small library of useful reference books in chemistry to which the students have free access during the entire day.

The chemical laboratories and lecture rooms of Teachers College are fully equipped for instruction in General, Organic, and Household, and Physiological Chemistry for students in Household Arts; and also for exercises relating to the teaching of Chemistry, for students preparing to teach physical science in secondary or normal schools.

Summer Surveying. These courses are conducted during each summer vacation at Camp Columbia, near Litchfield, Conn., where ample facilities are provided for all requisite operations, and where the topography is admirably adapted to the practical work of surveying. The courses there given are those announced above under the numbers 15s, 25s, 26s, 26as, 27s, 28s, 29s, and Astronomy 107s. For details consult separately printed pamphlets which may be had upon application to the Secretary.

Equipment. The department possesses an unusually full equipment of engineers' and solar transits, levels, plane tables, compasses, and all accessories, as well as similar instruments. Current meters and floats of various types are also used in making observations in the flow in and discharge of streams. Equipment. The Library facilities are unexcelled. Every journal of importance American or foreign, dealing with economics or social science, is taken regularly by the Library. Any book needed by advanced students can usually be bought at once. The special library of history and political science alone comprises more than 80,000 volumes.

The facilities offered to students of sociology and social economy include a large library of general and special works on sociological theory, the history of the family, pauperism, crime, and penology. Arrangements have been made with the Charity Organization Society, the State Charities Aid Association, the University Settlement, the East Side House, and the Brooklyn Bureau of Charities, by which students can become fully acquainted with actual work among the people and with the most perfect methods.

Students of economics and social science will find in New York unrivaled library facilities. In addition to the University, there are the New York Public Library on the Astor, Lenox, and Tilden foundation, New York Historical Library, Long Island Historical Library, Library of the New York School of Social Work, the Bar Association Library, and the Law Institute Library, to each of which students have access under favorable conditions. Advanced students also have at their disposal the library of the McVickar Professor of Political Economy which contains an important collection of works on earlier economies.

The Statistical Laboratory, conducted by Professor CHADDOCK, is equipped with the most modern devices for facilitating statistical work, including the Hollerith punching, sorting, and tabulating machines, Burroughs adding machines, and several calculators of the Brunsviga and Millionaire types, calculating tables, and materials and devices for the construction of graphs. Some of the most necessary current sources of statistical data, both for our own and for foreign countries, are kept upon the shelves for reference and instruction.

Students also have the privilege of attending all of the courses in the School of Social Work conducted by the Charity Organization Society.

EQUIPMENT: *Geological Laboratories.* The Geological Laboratories, lecture-rooms and museum are found in Schermerhorn Hall. They contain the collections and laboratory in invertebrate paleontology and stratigraphic geology, the collections in economic and inorganic geology, and the departmental library. The laboratory in 402 contains collections illustrative of the different kinds of rocks which are adapted to conferences in the course in general geology. There is also a much larger series of rocks, embracing nearly all the rare species and structures, which is used for advanced work in microscopic petrography and petrology. Parallel series of thin sections of these are provided, as are microscopes and other necessary apparatus for study, instruction, and investigation.

There are study collections in 101 accessible to the students, which illustrate the various geological formations and index fossils, and which are used in the lectures and conferences on stratigraphical and historical geology. A very complete series illustrating the ore deposits, associated geological formations, and useful minerals of North America housed in 301 is similarly employed in the lectures on economic geology.

For the physiographic work a large collection of mounted maps, including grouped sheets of various state and national surveys, is used. An excellent series of large wall maps and most of the sheets of the different countries of Central Europe are now available. Topographic and geologic maps of other foreign countries are being added as opportunity offers. A classified series of mounted photographs of landforms, accompanied by descriptive text, is made the basis of a part of the laboratory study.

The collection of fossil fishes is now deposited in the American Museum of Natural History, where the instruction in this subject is given by Professor DEAN of the Department of Zoology.

The collections in fossil botany and the paleobotanical books belonging to the University are now deposited in the New York Botanical Garden, where the instruction in this branch is given.

By arrangement with the American Museum of Natural History, advanced students in the University receive special privileges in its collections, which contain a wealth of geological and paleontological material specially adapted to comparative studies in connection with investigations.

Equipment. The University Library offers excellent facilities for the study of German, both on the literary and the linguistic side. The Scandinavian collection contains a good representation of the ancient saga and poetical literature, and most of the eminent writers of modern Norway, Denmark, and Sweden. The Holland Society library, deposited with the University in 1901, contains a considerable collection of books and pamphlets in the Dutch language from all periods.

The Library has sets and the current numbers of all the important periodicals which deal with Germanic literature and Germanic and general philology. It has also sets of periodicals no longer published, and a large collection of the transactions and publications of the learned societies of America and Europe.

The Tombo Memorial Library, consisting of about 2,000 works in modern and contemporary German literature, as well as a reference library of 2,000 volumes containing the most important material for the critical study of the Germanic languages and literatures and independent of the main collection in the University Library, are placed in the two rooms adjacent to the lecture-room and offices of the department in Philosophy Hall. A similar library of about 1,500 volumes, largely from the bequest of William Addison Hervey, is maintained in Hamilton Hall for the use of advanced college students.

The income of the Carl Schurz Library Fund (\$10,000), contributed by citizens of New York in commemoration of the seventieth birthday of Carl Schurz, is, by the terms of the gift, devoted in perpetuity to the purchase of books in the field of the German language and literature.

For the Carl Schurz Fellowship in the German Language and Literature, see index.

Germanic Club. The Germanic Club is an organization founded in 1902 for the purpose of reviewing and discussing important contributions to recent scholarship in the Germanic field. The Club consists of the officers, fellows, and scholars of the department. Meetings are held monthly.

Equipment. The General Library is unusually rich in early and rare editions of the Classics, and contains also an excellent selection of recent works on the Latin and Greek languages and literatures and on classical philology in general. The departments of archæology, epigraphy, palæography, Roman history, and Roman law are especially well represented. The library receives all the important serial publications issued abroad and at home, in the fields of philology and archæology. The Avery Library contains a large number of illustrated works on art and archæology as well as on architecture and offers an unusual opportunity for the study of these subjects. Furthermore, in the Drisler and Earle Collections in the departmental reading-room in Philosophy Building, the department possesses a special library of selected works which is at the disposal of graduate students. The department is also fairly well equipped with maps, plans, etc.; owns a large collection of photographs of Greek and Roman monuments, localities, and sculpture; and has a large number of squeezes of inscriptions. On the Roman side the Olcott Collection includes a valuable collection of ancient coins, some original inscriptions, and a collection of miscellaneous antiquities. The students of the University have free access to the collections of the Metropolitan Museum of Art for study and comparison.

Equipment. In addition to excellent working collections of constitutions, codes, session laws, judicial decisions, government reports, legal treatises, transactions of legal societies, and law journals of the principal foreign countries as well as of the United States, the Library of Columbia University offers special advantages to students of politics, public law, and comparative jurisprudence in the collections of Henry Livingston Thomas, late chief translator to the Department of State, of the Holland Society of New York, and of the Reform Club of the City of New York, of which the Columbia Library is the depository. The materials thus furnished are richly supplemented by those in the libraries of public institutions, learned societies, and civic organizations, particularly the Hispanic Society of America, with its unique collection of materials relating to the history, institutions, and culture of Spain, Portugal, and Latin America, the Bar Association, and the Law Institute. To these libraries advanced students have access under favorable conditions. Fuller information as to courses and opportunities for historical work is given in the current *Announcement of the Division of History, Economics, and Public Law*, which may be obtained by applying to the Secretary of the University. Under the auspices of the Academy of Political Science, to which advanced students are eligible as members, opportunities are given for the discussion of questions of interest as presented in papers by specialists.

Lectures of special interest to students of politics and jurisprudence are maintained by specific endowments, such as the Beer lectures in political science, the Blumenthal lectures in politics, and the Carpentier lectures in law. Some of these lectures are given by distinguished foreigners, others by men prominent in public life in the United States.

Equipment. The library facilities of Columbia University and of the city of New York, for students of philosophy and psychology, are unusually good. The collection of books on the history of philosophy in the University Library is very large, that on Kant and his philosophy being especially complete. About 1,000 periodicals are regularly received, and among them will be found every journal of importance, American or foreign, dealing with philosophy or psychology. Duplicates of the more important psychological books and journals are placed in the Psychological Laboratory, where there is also a card index of psychological literature containing over 50,000 titles. Students of psychology will also find much of value in the Library of the Academy of Medicine, 17 West Forty-third Street, which is open to students free of charge. The New York Public Library is available for students, when introduced by one of the instructors, on especially favorable terms.

The Psychological Laboratory in Schermerhorn Hall, besides the lecture-room and laboratories for introductory courses, contains rooms available for research work, some of them being specially constructed for particular sorts of psychological experiments. There is also a departmental library of the most important original literature of experimental psychology, and a mechanical workshop.

Equipment. The main exercising-room is semi-circular in shape, and has a floor area of 16,000 square feet. The ceiling is 35 feet high, and the room is well lighted and well ventilated, both naturally and artificially. The running track is 11 feet wide, with ends raised, and measures 10 laps to the mile. On the same floor as the running track are the Gymnasium and Director's offices, an auxiliary gymnasium 80 x 100 feet, rooms for fencing, boxing, and handball, two large dressing-rooms with 2,600 steel lockers, and 32 shower-baths. Below the exercising-room is the swimming pool, semi-circular in shape; it measures 100 by 50 feet on its axes, and contains 260,000 gallons of water which is filtered and sterilized daily. The depth is from 4 to 10 feet. Around the pool are the dressing-rooms and 20 shower- and needle-baths. On this floor is also a large room and two dressing-rooms equipped with shower-baths and lavatories, for the use of the various athletic teams.

The athletic field is equipped with a $\frac{1}{4}$ -mile running track, football field, baseball field, basketball court, facilities for jumping, pole vaulting, putting the shot, etc., 12 tennis courts, and a dressing-room with 1,000 lockers and shower-baths.

The Gould Boat-house, located on the Hudson River, at the foot of 116th Street, is equipped with boats of all descriptions, lockers, baths, etc.

The Frederick Ferris Thompson Memorial Building, which houses the department of Physical Education of Teachers College, was given by Mrs. F. F. Thompson. It is a building of four stories, devoted to the purpose of physical education and educational hygiene. It contains offices, examination rooms, lecture- and class-rooms, laboratories,

handball courts, bowling alleys, a swimming pool, four gymnasiums, rooms for corrective exercises, dressing-rooms, shower-baths, and a suite of rooms for photographic purposes. This building provides physical-training facilities for women and the pupils of the Horace Mann School, and the varied equipment for the theoretical and practical instruction of professional students in physical education.

Students Hall, the gift of Jacob H. Schiff to Barnard College, was opened in September, 1917. This building provides for Physical Education purposes three gymnasium floors, one 102 by 85 feet, and two smaller rooms, a swimming pool 60 by 30 feet with a depth of 4 to 8 feet, lockers and dressing-rooms, rest-rooms, and departmental offices; here also are the library, class studies, dining-rooms, offices of the different college organizations, and rooms used for various social purposes.

The Gymnasium is open daily during the academic year, except on Sundays and legal holidays, from 8:30 a. m. to 6:30 p. m., Tuesdays, Fridays, and Saturdays, and 8:30 a. m. to 10. p. m., Mondays, Wednesdays, and Thursdays. It is closed for the entire day only Thanksgiving, Christmas, New Year's, and Good Friday. On all other holidays it is open from 3 to 6 p. m. One or more of the instructors are on the floor at all times when the Gymnasium is open.

A course in physical education is required of all freshmen and sophomores in Columbia College. A physical examination is required of each student in these classes upon entrance and at the end of the required work, and of all other students taking part in athletics.

Every student is entitled to a physical examination by the Medical Director. On the basis of this examination advice is given as to the kind and amount of exercise best adapted to his needs.

Equipment. The laboratories and lecture-rooms of the Department of Physics are in Fayerweather Hall. They are supplied with the usual general equipment of a physical laboratory.

The laboratories used for research work have been named by the Trustees the "Phoenix Physical Laboratories," in memory of Mr. Stephen Whitney Phoenix, who bequeathed to the University an endowment for research in physics and chemistry.

Under the direction of the professor of electro-mechanics, laboratories have been equipped in Philosophy Hall from the Marcellus Hartley fund for research in the subjects of electricity and magnetism. The laboratories afford unusual opportunities for students desiring to specialize in these subjects.

The Ernest Kempton Adams Precision Laboratory is equipped with instruments of the best design and highest precision for measurements in mechanics, heat, light, radio-activity, and those branches of electricity not already provided for by the Marcellus Hartley fund.

The physics laboratories at Barnard College occupy the second floor and a part of the basement of Fiske Hall. They are well equipped for quantitative experimental work in the courses offered.

The physics laboratories and lecture-room of Teachers College are especially equipped for illustrating the teaching of physics in secondary and normal schools.

Several investigators' tables are held at the Woods Hole Laboratory, and the John D. Jones scholarship is available at the Cold Spring Harbor Laboratory.

UNDERGRADUATE ENTRANCE REQUIREMENTS

University Committee on Admission. Professor JONES, Director of University Admissions; Professors EVANS and MAYER; Deans WOODBRIDGE, STONE, DARRACH, GILDERSLEEVE, and RUSBY; Directors EGBERT, MONROE, BIGELOW, and BORING, and Acting Director CUNLIFFE.

General Statement. The Director of University Admissions administers the entrance requirements for all departments of the University. No formal entrance tests are prescribed for graduates who elect to study under the Faculties of Political Science, Philosophy, or Pure Science, or to enter a professional school of the University which demands previous college residence as a basis for entrance; namely, Law, Medicine, Mines, Engineering and Chemistry, Architecture, Education, Business, and Journalism. Candidates for admission to these schools should present their credentials from the college of previous residence. Entrance tests are prescribed for admission to all other departments of the University. Admission to the first year course in Columbia College, Barnard College, and the College of Pharmacy (University course for B.S. in Phar.), presupposes the passing of written examinations; the candidate's school record is also taken into account; but a satisfactory showing in examinations and in school preparation are not in themselves sufficient to guarantee admission, which depends also upon the candidate's character, personality, and promise of future usefulness. The School of Practical Arts may be entered either by examination or, in approved cases, by school certificate.

Applications for Admission. Applications for admission should be filed not later than July 1 of the year when the candidate plans to enter.

Examinations and Records. The University issues annually a pamphlet entitled *Bulletin of Entrance Examinations and Admissions*. This pamphlet gives detailed information upon the following matters:

The time schemes for the examinations of the College Entrance Examination Board and of Columbia University.

The dates for filing of applications. (Given also in Academic Calendar at end of this volume.)

Method of obtaining, filling out, and filing application blanks and school records.

Fees for examinations and method of payment.

The award and duration of credits toward admission as a result of examinations, and information as to the conditions under which examinations may be divided among two or more series.

The specific conditions of admission to each school requiring entrance examinations.

The official statements of the requirements in each subject (including information as to the preparation and presentation of note-books in subjects requiring such records).

This pamphlet may be had without charge upon application to the Secretary of Columbia University. Any person who intends to take examinations himself or to prepare others for them should obtain a copy of it and familiarize himself with its contents. *The information which follows here is merely a brief summary of that given fully and officially in the Bulletin.*

The minimum age for admission to the Freshman Class in Columbia College or Barnard College is 15; in Journalism, 17; in other schools, 18; with a corresponding increase in the case of advanced standing. For students entering from secondary schools, an estimate of character and personality, and a certificate of health must be presented, and in the case of students from other colleges an honorable dismissal.

Students may enter Barnard or Columbia College either in February or in September. Of the following methods of admission, the first applies to Columbia College only.

I. The new method of admission, employing the intelligence examination.

Candidates who have graduated with good grades from an acceptable secondary school and have completed an acceptable course of study, on submitting satisfactory records of school work, health, character, and promise, receive permission to substitute an intelligence examination for the entrance examinations required by the old method. The course of study must have included the prescribed entrance subjects and must have been concerned primarily with language, science, mathematics, and history.

II. The old method of admission by entrance examinations.

(a) The student may satisfy the requirements in the subjects required for admission by passing entrance examinations covering 15 entrance units. In passing upon the results of the examinations in the several subjects, the candidate's school record is taken into account.

(b) On this plan a candidate whose school record has been approved may receive permission to satisfy the examination requirements by comprehensive examinations in not less than four subjects approved by the committee on admission. The comprehensive examinations in questions must be those prepared by the College Entrance Examination Board.

Each candidate is required to take examinations in every subject offered for admission. In passing upon the result of these examinations the detailed school record of the candidate is taken into account and given great weight.

The examination requirements for admission under the old plan may be satisfied by any one of the three following means, or by any approved combination thereof; the examination grades are interpreted in the light of the record which the student has made in school. The record for each subject must be filed with the Director of Admissions.

1. The examinations of the College Entrance Examination Board in 1920, beginning on June 21, held at Columbia University and at about 150 other educational centers in the United States and Europe.

2. The examinations conducted at Columbia University by the Committee on Admissions. These examinations are held in September and January of each year (beginning on September 13, 1920, and January 13, 1921).

3. The examinations of the New York State Examination Board in so far as their subject matter specifically corresponds to the stated requirements of the several undergraduate schools. These examinations are held in January and June at more than 600 high schools and other institutions in the State, but are ordinarily open only to students in those schools. A grade of seventy-five per cent. will ordinarily be required in these examinations.

Credits. A candidate may present himself at any of the series of examinations scheduled above, but at not more than four in all, and the results may be credited toward entrance, subject to the following restrictions:

The results of an examination may stand to the candidate's credit twenty-nine months, but no longer. The reports of candidate's examinations and the School's statement of preparation must be in the hands of the Director of Admissions one week prior to the opening of the term in September or February.

Subjects for Examination. Columbia University recognizes the following examination subjects which may be offered for admission to one or more of the colleges and schools included in the University, each subject counting for a specific number of units as indicated in parentheses. The units here represent the number of years at the rate

of five periods per week, which will normally be required in the secondary school to prepare adequately for the college examination.

The following abridged statements give the general scope of the requirements in each subject. It should be noted that in several cases an examination subject outlined below will not be accepted toward admission to every school of the University. A candidate or teacher should compare the list carefully with the statements of the requirements of the school in which he is particularly interested.

Definitions. (Specimens of the question papers set by Columbia University are on file in the University Library or may be obtained from the Director of University Admissions upon application. The question papers set by the College Entrance Examination Board are published annually in book form by Ginn & Company, New York.) *Arithmetic, Modern Commercial and Higher* (1 unit). (For the details of admission to the Freshman Class see page 194)

Advanced Standing. A candidate for admission to advanced standing upon basis of work done at another college should obtain and file not later than September 1 or January 1 of the session in which he desires to enter, the appropriate application blank, with a transcript of his academic record, and a marked catalogue of the institution that he leaves.

Special Courses. Students of serious purpose who are in a position to fulfil the requirements for admission to the Freshman class or who have had a valuable educative experience in practical life, may be admitted as non-matriculated students to pursue courses without reference to any degree. For details see the current *Announcement of Columbia College*.

REGISTRATION AND FEES (See page 70)

SCHOLARSHIPS (See page 289)

Program of Studies. The period within which the requirements for the degree of A.B. may be satisfied varies with the capability and industry of the individual student. In most cases four years are spent in making the required number of points; students of ability and industry frequently complete the course in less time, especially if advantage be taken of courses in the Summer Session, or additional credit be gained by high standing; no student may spend more than six years as a candidate for a degree.

¹ Deceased.

General Regulations. For students matriculating after July 1, 1916, the degree of A.B. only will be conferred; for information as to the requirements for students having matriculated at an earlier date consult the *Catalogue* for 1915-1916. The requirement for graduation is 124 points, the term 'point', signifying the satisfactory completion of work requiring attendance each half-year of one hour weekly in lectures, recitation, or honors conference, or a correspondingly longer period in laboratory or drafting-room.

Admission to courses depends strictly upon completion with the grade of C or better of the stated prerequisites.

A student in good standing is permitted upon completion of 94 points to elect approved graduate courses which his previous training will enable him to pursue with profit.

To be recommended for a degree, a student must have made at least 84 points in actual college residence, and of these at least 24 in Columbia College. (Supplementary details are given in the current *Announcement of Columbia College*.)

In the administration of the College regulations, it is the policy of the Committee on Instruction and of the Dean to be guided in the treatment of individual cases largely by the recommendation of the adviser, and by the general attitude of the student in question toward the College, *i. e.*, whether or not he has proved himself a creditable member of the college community, as shown by regularity in attendance, promptness in the fulfilment of his obligations, earnestness in his endeavor to profit by his college opportunities, both direct and indirect, and by consideration of others.

With the recent rapid growth of the College, the Committee has been compelled, in the interest of sound teaching, to limit the attendance upon certain courses which cannot be broken up into sections. Admission to such courses is based in part upon priority of application and in part upon the operation of the policy described in the preceding paragraph.

For Honors Candidacy. Any student free from entrance conditions may elect to study for a degree with honors and pursue a curriculum involving less prescribed work but more independent reading and more thorough study in chosen subjects than are required of the general candidates for a degree.

The choice between the honors curriculum and the general curriculum is ordinarily to be made not later than April 15 of the Freshman year. The candidate chooses two subjects in which he will offer honors work and in consultation with the officers in charge of the subjects he has chosen plans his courses so as to meet the honors requirements.

The granting of honors is dependent upon the completion with high standing of honors courses in each of the chosen subjects, these courses being designed to guide the candidate's supplementary reading, and upon a final general examination covering the entire field of his honors work.

For candidates for a degree with honors the following courses only are prescribed: English A, Mathematics A, Contemporary Civilization A, Physical Education, and the satisfaction of the foreign language tests (see below).

If at the end of any term examination a student fails in any course in his honor subjects to attain a grade of A or B, he is rejected as a candidate for honors and given appropriate credit toward an ordinary degree.

Upon the satisfactory completion of an honor sequence and the corresponding honors courses and upon the recommendation of the officer in charge, the candidate is given a general examination. This examination, partly written and partly oral, covers the class-room work of the three years and tests the thoroughness of the assigned supplementary reading.

A grade of A in both subjects entitles the candidate to receive a degree with highest honors. A combination of A and B entitles him to a degree 'with high honors,' and uniform grades of B to a degree 'with honors.' For further details see the current *Announcement of Columbia College*.

For Degree without Honors. Unless the equivalents have been offered for admission, the following courses are prescribed for students who are candidates for a degree, but not for honors:

A. English A and B; Mathematics A; Contemporary Civilization A; Physical Education, Laboratory Science, except for students offering Physics and Chemistry for entrance, and in addition:

- B. 1. One year of College work in Latin or in Greek beyond the entrance requirement, and in addition French B or German B, or
 2. One year of College work in French or German beyond course B, or beyond the intermediate or advanced entrance requirement, or
 3. Completion of the stated entrance requirements for the Schools of Medicine, and in addition:

These prescriptions amount to a total of from 26 to 55 of the 124 points required for the degree, depending upon the student's offering at entrance and his college program.

Prior to graduation the student must have completed the equivalent of three years of sequential study, in courses aggregating at least 18 points beyond the elementary requirement for admission, in each of two departments.

Professional Options. Upon receiving the number of points specified below in Columbia College, a student may take studies in the first year of any one of the following professional schools of the University, provided he can satisfy the stated requirements for admission thereto, and may receive a Bachelor's degree from the professional school of his choice upon the satisfactory completion of two years' work in that school:

College of Physicians and Surgeons, 72 points
 School of Business, 64 points
 School of Journalism, 64 points

COMBINED COURSES

Upon receiving 94 points, 64¹, of which must be for work in Columbia College, including all of the work prescribed for the degree in Columbia College, a student may take studies in the first year of any one of the following professional schools of the University, provided he can satisfy the stated requirements for admission thereto, and will receive the degree of Bachelor of Arts from Columbia College upon the satisfactory completion of the year's work:

School of Law
 College of Physicians and Surgeons
 Schools of Mines, Engineering, and Chemistry
 School of Architecture
 School of Journalism
 School of Business

No course may be counted toward a professional degree and at the same time be included among those which go to make up the 94 points referred to above.

Students who entered Columbia College before July 1, 1917, should consult the *Announcement of Columbia College* and that of the professional school of their choice for the year 1917-1918 in regard to professional options which are open to them.

Students may also, under suitable circumstances, offer toward the Bachelor's degree courses given at the Union Theological Seminary or the General Theological Seminary; or if they are within 12 points of receiving the Bachelor's degree, they may take certain graduate courses in addition to their undergraduate programs.

¹ In exceptional cases, students of high scholarship who have completed two years of college work elsewhere may satisfy the residence requirement by the completion of 34 points, not including Summer Session or Extension Teaching.

Miscellaneous. All students admitted with conditions are assigned for advice to the Committee on Admissions until such time as their entrance deficiencies be removed. All candidates for honors are assigned for advice to a representative of the department in which they first elect honor work. Special advisers are designated for students looking forward to law, medicine, engineering, and business, respectively. All other students are assigned to the Dean of the College, or to such officer of instruction or administration as he may designate.

The student's performance in a course is reported according to the following grades: A, excellent; B, good; C, fair; D, poor; F, failure.

A student who receives a mark of F in any prescribed course must repeat that course. In any session not more than one course marked D, may be counted toward a degree. Students receiving D may for the purpose of satisfying the requirements as to prerequisites improve this grade by re-examination, but without change in point credit.

The mark A in any two courses completed in any session (no course being counted twice) entitles a student who has not fallen below the mark B to one point of extra credit.

Matriculated students whose record as to entrance conditions and the completion of prescribed courses is satisfactory to the Committee on Instruction, are classified as follows:

Freshmen, those who have less than 26 points

Sophomores, those who have completed 26 points

Juniors, those who have completed 58 points

Seniors, those who have completed 88 points

The following additional matters are dealt with in the current *Announcement of Columbia College*, which may be had upon application to the Secretary of the University: Description of Hamilton and Hartley Halls. Advice as to choice of studies. Regulations governing absences. Statement of courses which may be taken by College students with their prerequisites. Personal relations of students. Probational standing. System of examinations. Records and reports. Schemes of attendance and recommended programs for students having particular ends in view.

SCHOOL OF LAW

FACULTY

President BUTLER.

Dean STONE.

Professors ABBOTT, CANFIELD, COOK, GIFFORD (*Secretary*), GLENN, GUTHRIE, MOORE (JOHN BASSETT), MOORE (U.), PARKINSON, POWELL, SMITH (MUNROE), SMITH (Y. B.), TERRY.

Delegates to the University Council (see page 6).

Purpose. The Design of the School of Law is to afford a thorough, practical, and scientific education in the principles of: The common and statute law of the United States; the English and American system of equity jurisdiction; the Public law of the United States and Europe; the Roman law—ancient and modern; theoretical and comparative jurisprudence.

Opportunity is given through short special courses for specializing in particular fields.

Application. All applicants for admission must present satisfactory evidence of good moral character.

Admission to the School of Law as a matriculated student will be upon one of the following three conditions:

(a) Graduation from an approved college or scientific school of collegiate rank.

(b) The successful completion of three years of undergraduate study in an approved college or scientific school, which course of study must have included satisfactory courses in Economics and in English and American History.

(c) In lieu of either of the above, the presentation of satisfactory evidence of preliminary training obtained in higher institutions of learning, in this country or abroad, equivalent to that prescribed in either of the foregoing paragraphs (a) or (b).

Advanced Standing. Students complying with the above requirements for admission to the School, who have, in addition, successfully pursued the study of law for at least a year in an approved law school, on examination giving satisfactory evidence of proficiency in the studies of the first year, may be admitted to advanced standing as members of the second-year class. Examinations are usually required in the more important first-year subjects. No one will be admitted to advanced standing beyond the second year except by special vote of the Faculty.

The examinations for advanced standing cover all the work previously done by the class to which admission is sought, and are held at the end of the half-year in which the respective subjects are given and during the week preceding the opening of the fall term. Examinations may be dispensed with and credit given on certificate for courses satisfactorily completed in an approved law school in cases where such courses are deemed by the Faculty equivalent to the corresponding courses given in this School.

Non-Matriculants. Duly qualified persons not candidates for the degree of LL.B. may be admitted as non-matriculated students on presenting such evidence as the Faculty may require of their exceptional fitness to undertake with advantage the study of law. Applicants must usually have two years or more of College or Law School work to their credit and must be at least twenty-one years of age.

Examinations. Written examinations are held at the end of each half-year on the subjects completed during that half-year and on the subjects of the first and second years during the week preceding the opening of the academic year

All students, whether matriculated or non-matriculated, must, unless excused by the Dean, present themselves for examination in all the subjects for which they are registered at the first examination held therein, and, in case of excuse from any examination, must take the next examination offered in such subject. *A student permitted to take a deferred examination must pay a fee of five dollars as for a deficiency examination.* Students are not permitted to take examinations in courses for which they are not regularly registered.

At all stated examinations the standing of students will be indicated by the letters A, B, C, D, and F, representing Excellent, Good, Fair, Poor, and Failure, respectively. These grades will be part of the record of the students in the office of the Registrar, and will be reported to them as soon as possible after each examination.

No student will be admitted to the second-year class who is deficient in more than four hours of the work of the first year. No student will be admitted to the third-year class who is deficient in any subject of the first year, or in more than one full course or in more than two half-year courses of the second year.

No student failing in any subject will be permitted to take a second examination therein without having again taken the course in which such failure occurred, nor will any student failing a second time in any subject be allowed to continue in the School except by special vote of the Faculty.

No special examinations are given.

Bachelor of Laws. The required work for the degree of Bachelor of Laws consists of seventy-six points, each point representing the satisfactory completion of work requiring attendance one hour a week for one-half year. This requirement must be satisfied by a three years' residence and is usually met by a program embracing the prescribed work of the first year and of twelve hours or more of lectures per week through the second and third years.

No candidate for the degree may take less than twelve nor more than fourteen hours per week in the Winter or Spring Sessions.

Students registered in the Law School will, on approval of the Faculty, receive credit not exceeding seven points in any one year for law courses successfully completed by them in the Summer Session of the University. Attendance at a Summer Session will be deemed equivalent to one-fourth year's residence.

Not more than one full course representing four points nor more than two half-year courses representing three points each in which the student receives a mark of D may be counted toward a degree in any one year.

No student failing in any subject for which he is registered will be admitted to the degree unless within two years of such failure he receives a mark of C, at least, therein.

Non-matriculated students who have been members of the School for at least two years may become eligible for the degree if they shall have attained an average of B in all the work prescribed therefor.

MASTER OF LAWS (See page 226)

Higher Degrees. The degrees of Master of Arts and Doctor of Philosophy are also awarded for work done in part under the Faculty of Law. (See page 224.)

SCHOLARSHIPS AND PRIZES (See page 289)

FEES (See page 70)

Library. The Law Library has been greatly extended and improved, and now consists of upwards of 64,000 volumes, which have been carefully selected to meet the wants of students. It contains practically every reported decision of the American, English, and British Colonial courts, and good working collections of American and foreign statute law, Roman and modern civil law, and jurisprudence. Lectures on legal bibliography and the use of law books are given by the Law Librarian.

Historical. King's College—the original foundation of Columbia University—organized a Medical Faculty in 1767, and was the first institution in the North American Colonies to confer the degree of Doctor of Medicine in course. The first individuals to graduate in medicine from the College were Robert Tucker and Samuel Kissam, who received the degree of Bachelor of Medicine in May, 1769, and that of Doctor of Medicine in May, 1770, and May, 1771, respectively. Instruction in medicine was given from this time on until the work of the College was broken up by the War of the Revolution. In 1784 an act was passed making Columbia College in the City of New York the successor of King's College, and instruction was resumed in the academic department. Eight years later the Medical Faculty was re-established, and was continued until 1814, when the Medical Faculty of Columbia College was merged in the College of Physicians and Surgeons, which had received an independent charter in 1807. In 1860, by agreement between the Trustees of the two institutions, the College of Physicians and Surgeons became the medical department of Columbia College, and from that time on the diplomas of the graduates were signed by the President of Columbia College as well as by the President of the College of Physicians and Surgeons. The connection was only a nominal one, however, until 1891, when the College was definitely merged in the University.

Location and Equipment. The College of Physicians and Surgeons was first situated at 18 Robinson Street, from 1807 to 1809. From 1809 to 1813 it was at 12 Magazine Street; from 1813 to 1837 at 3 Barclay Street; from 1837 to 1856 at 67 Crosby Street; and from 1856 to 1887 at 101 East Twenty-third Street. It now occupies a group of buildings which stand upon thirty contiguous lots of land, bounded on the south, west, and north by Fifty-ninth Street, Amsterdam Avenue, and Sixtieth Street, respectively.

Main Building. The main College buildings have been designed to facilitate the combination of theoretical instruction with laboratory work, which is essential to a modern scientific training. In these buildings, which have a floor space of 125,000

square feet, are the lecture halls, the recitation rooms, and the laboratories, under the supervision of their respective professors, all thoroughly equipped for the routine work of the regular classes and for the special original and research work of the advanced students, instructors, and professors of the several departments; the administrative offices, the laboratories of physiology, bacteriology, anatomy, embryology, and histology, organic and biological chemistry, medicine, neurology, surgery, pharmacology, pathology, and clinical pathology, the morphological museums and laboratory, a dissecting-room accommodating 400 students, and two large amphitheaters.

For a more detailed account of the equipment of each department, see the departmental statements.

Presbyterian Hospital. The alliance brought about by the mutual action of the two boards of trustees between the College of Physicians and Surgeons and the Presbyterian Hospital permits the scientific and clinical direction by the University of the medical, surgical, and pathological services of the hospital. A clinic service in medicine and in surgery has been organized in the hospital and placed in the charge of the Professors of Medicine and of Surgery, respectively. These services contain about 100 beds each and form an admirable ward hospital service for the Departments of Medicine and of Surgery. The Presbyterian Hospital contemplates the building of a new plant in which the present arrangements will be far surpassed, both in scientific facilities and in the number of beds.

The exceptional advantages of such an alliance between the College and the Presbyterian Hospital can scarcely be overstated. The system of sending fourth-year students to the various hospitals as clinical clerks has been strengthened and made more effective. The students will be sent to the other hospitals, which have admitted clinical clerks, as heretofore, but the wards of the Presbyterian Hospital offer a more thorough opportunity for the study of bed patients. This development has placed the College of Physicians and Surgeons in the position where its clinical facilities are commensurate with the laboratory development which has taken place during the last ten years.

Library. The libraries of the College of Physicians and Surgeons consist of a general reference library with reading room, and the special libraries of various departments. The general reference library is located on the first floor of the main building. It is open during the day and evenings and is freely accessible to all students. It contains 10,000 volumes and as many pamphlets, which include a collection of current text-books and monographs and the most important current medical journals. The books are classified according to the classification of the Library of Congress, and are catalogued with author, subject, and title entries. The catalogue will eventually become a union catalogue of all books in the different libraries of the College. Books are loaned out over night for the convenience of students who wish to study at home. The special libraries are located in the rooms of the various departments. They consist largely of periodical literature, but include many monographs and other books relating to the subjects of the respective departments. They are of special interest to the investigators in these departments, but may be used by other students upon special request.

More than 300 periodicals are received in the several libraries of the College. The number of volumes and pamphlets is as follows:

Anatomy, 2,500 volumes, 3,000 pamphlets; Biological Chemistry, 3,000 volumes, 10,000 pamphlets; Pathology, 5,700 volumes, 2,000 pamphlets; Pharmacology, 450 volumes; Physiology, 10,000 volumes, 14,000 pamphlets; Practice of Medicine (Jane-way Library), 9,500 volumes, 3,400 pamphlets; Reference Library, 10,000 volumes, 10,000 pamphlets; Surgery, Hartley and Blake Libraries (at the Presbyterian Hospital) 1,000 volumes, 1,000 pamphlets; Crocker Fund, 1,500 volumes; total, 39,330 volumes, 43,400 pamphlets.

Crocker Fund. This fund was established by a legacy from the late Mr. George Crocker for the purpose of conducting an investigation on the subject of cancer. The

research laboratories of the Fund are situated on East Field, in a three-story and basement fireproof structure, measuring about forty by one hundred feet. The building is very completely equipped with the necessary apparatus for the experimental study of cancer, and contains a large collection of specimens, a very complete library, photographic, and photomicrographic apparatus, etc.

The immediate object of the Fund is the promotion of research in cancer. Voluntary workers who have had suitable preparation in pathological histology and pathology are welcome, and will be given sufficient instruction to enable them to pursue in a satisfactory manner some phase of cancer research. Formal courses will also be offered by the staff in pathological technique and tumor biology.

Vanderbilt Clinic. The Vanderbilt Clinic is a fully equipped dispensary for the sick poor. It affords ample material for extended practical clinical instruction in the various departments of medicine and surgery, as the professors, with their clinical assistants, have the entire charge of its practice. The building is so arranged that each department has a room for the practical instruction of students in small sections, in addition to the rooms devoted to the treatment of patients; besides, there is a large theater for clinical lectures and a small lecture hall. Modern appliances for the treatment of diseases have been introduced, so that students can learn thoroughly the use of methods in each of the special departments of medicine. During the year 1919, 31,934 patients were treated, making 144,441 visits to the Clinic. For detailed information as to the clinical lectures held here, see the departmental statements in this volume, or the current *Announcement of the College of Physicians and Surgeons*.

Sloane Hospital. The Sloane Hospital for Women is under the direction of the Professor of Obstetrics and Gynecology in the College of Physicians and Surgeons, an Instructor in Obstetrics and an Instructor in Gynecology being the Resident Officers. The wards of the Hospital furnish 107 obstetrical beds, 100 babies' cribs, and 25 gynecological beds. In addition there are 38 private room beds and accommodations for the house staff, students, and nurses. There are two large operating rooms, one for obstetrics and one for gynecology, each equipped with modern appliances for dealing with these conditions, where weekly clinics are held throughout the year. The deliveries number about 1,950 each year.

With the completion of the Gynecological Department of the Sloane Hospital, the operative material of the large gynecological service of the Vanderbilt Clinic is made available for teaching purposes, so that students of the College of Physicians and Surgeons receive on the college grounds practical instruction, not only in normal and complicated obstetrics and the care of young babies, but in the treatment, operative and palliative, of all diseases of the female pelvic organs.

Hospital Clinics. The College is strongly represented on the staffs of most of the general and special hospitals of New York. In them both required and optional practical instruction is given by clinical lectures, in the dispensaries and at the bedside, all of which are prominent features of the curriculum. These hospitals are as follows: Roosevelt, Bellevue, Presbyterian, New York, St. Luke's, Lenox Hill, Mt. Sinai, City, Lincoln, New York Orthopedic Hospital, St. Mary's Free Hospital for Children, Willard Parker, Scarlet Fever and Reception, New York Eye and Ear Infirmary, the Babies' Hospital, Herman Knapp Memorial Eye Hospital, the Manhattan Eye, Ear, and Throat Hospital, and the Montefiore Home and Hospital. For a detailed statement, see the current *Announcement of the College of Physicians and Surgeons*.

Plan of Instruction. Each year is divided into Winter, Spring, and Summer sessions. The requirements for admission are given elsewhere, but too much stress cannot be laid upon the desirability of a student fulfilling the spirit, as well as the mere letter, of these requirements. Physics, inorganic, qualitative, and organic chemistry and biology. English, and a modern language are now required for admission, and the student of

medicine will grasp the advanced subjects forming the groundwork of the course the more easily and with the better understanding just in proportion to the breadth and completeness of his preliminary education.

In the arrangement of the different branches of the medical instruction, a logical order of the main themes and a coordination in the work of each department have been sought after, enabling the student to concentrate his attention upon some one subject and to be so familiar with it that the allied subjects next to be taken up shall be readily understood. The salient features in the method of instruction are thorough laboratory training, frequent demonstrations, clinical teaching in the operating theaters and at the bedside as well as in the dispensaries, with recitations and didactic lectures to elucidate the many problems confronting the student.

In the first year the time of the student is devoted largely to anatomy, including histology and embryology. The instruction is carried on mainly by numerous demonstrations to sections and by long periods of uninterrupted work in the dissecting-room. Physiology and physiological chemistry are taught by lectures, demonstrations, recitations, and practical work in the laboratory.

In the second year anatomy and physiology are completed. The lectures, recitations, and laboratory courses in pharmacology and bacteriology are attended. As preliminary to the third and fourth years, recitations from text-books are held in obstetrics and surgery. In the second half of the year they study general, gross, and clinical pathology and are prepared for the study of medicine by an elementary clinic, and by instruction in the methods of physical diagnosis.

During the third year recitations in medicine and surgery are continued and those in gynecology, diseases of children, and therapeutics are begun. There are theoretical or clinical lectures in medicine, surgery, pharmacology, and therapeutics, obstetrics, gynecology, neurology, laryngology, otology, urology, ophthalmology, dermatology and syphilology, orthopedic surgery, and diseases of children. The class is divided into small sections for instruction in physical and medical diagnosis, and in the special branches of medicine and surgery at the various dispensaries and hospitals.

The student in the fourth year spends most of his time in the hospitals and dispensaries of the city. Consequently, although a few general and clinical lectures are still given, the work is almost entirely practical and bedside instruction. Divided into small groups, the students continue to come into personal contact with patients under the supervision of the instructor. In this way they have the opportunity to become familiar with the history of a case, to make a complete physical examination, to form a diagnosis, to give a prognosis, to advise treatment, and to watch progress. For an obstetrical service, the unsurpassed facilities of the Sloane Hospital for Women and out-patient obstetrical department in connection with the Nursery and Child's Hospital, offer excellent opportunities. Here the student is required to live for five weeks and personally attend a certain number of cases of labor. The course in diseases of children includes bedside instruction at Babies, Bellevue Hospital, St. Mary's, and Lenox Hill Hospitals, where exceptional advantages are enjoyed by the student for studying all forms of acute disease in infants and young children. The course is rounded out by personal instruction in the more special branches of medicine. In these branches the student is taught how to use instruments of precision and to recognize and treat successfully many of the rarer forms of disease.

Clinical Clerks. Courses in the wards of St. Luke's, Bellevue, Roosevelt, the Mt. Sinai, the Presbyterian, the New York, the Lenox Hill Hospital, and Montefiore Home and Hospital, have been opened by those institutions to fourth-year medical students. These courses consist of work in the wards of the hospitals during which the students serve as clinical clerks both in medicine and surgery and become for the time being members of the regular staff.

Admission. All candidates must present the medical-student certificate of the Regents of the University of the State of New York, based on the following qualifications: The minimum requirements for admission to the first year will comprise two years of college work aggregating 72 points, as rated at present in Columbia College for the candidates of the "combined course." A standard year of college work completed, with good grades, would ordinarily be valued at 30 points, but 72 points can be completed in two years in most colleges. Summer session courses may be used when necessary to supplement the work done in the regular college year. The 72 points must include one year of physics, one year of inorganic chemistry based on college entrance chemistry, one-half year of qualitative analysis, one-half year of organic chemistry, one year of biology, two years of college English, and the equivalent in either French or German of courses A and B as prescribed by Columbia College. The preparation in physics, chemistry, and biology, which will be required for admission, is represented by the following courses in Columbia College:

Physics A1-A2—General elementary physics. Three lectures and 2 hours' laboratory work a week for one year.

Chemistry 3-4—General inorganic chemistry. Three lectures and 6 hours' laboratory work a week for one year.

Chemistry 11—Qualitative analysis. Two lectures and 6 hours' laboratory work a week for one-half year.

Chemistry 46—Organic chemistry. Three lectures and 6 hours' laboratory work a week for one-half year.

Zoology 1-2—Elementary biology and zoology. Two lectures and 4 hours' laboratory work a week for one year.

While the above courses represent the minimum requirements for admission to the first year, it is highly recommended that, if possible, the college work include three, instead of two, years, so as to allow a more thorough preparation in physics, chemistry, and biology. Such a three-year course, as offered by Columbia College, includes among other studies the following courses in the basal sciences. Although this combination of courses is given in Columbia, it is not essential that other colleges should adhere to this curriculum, except in so far as the minimum just given above is concerned. Other advanced work in the preliminary sciences would undoubtedly fit the student for his medical work in a most satisfactory manner.

Mathematics 1—Algebra. Three hours a week for one-half year.

Mathematics 4—Analytical geometry. Three hours a week for one-half year.

Mathematics 57-58-59—Differential and integral calculus. Three hours a week for 1 year.

Physics 6—Mechanics and wave motion. Three lectures and 1 recitation a week for one-half year.

Physics 7—Heat and light. Three lectures and 1 recitation a week for one-half year.

Physics 8—Electricity. Three lectures and 1 recitation a week for one-half year.

Physics 41-42—Physical laboratory. Four hours a week for 1 year.

Chemistry 3-4—General inorganic chemistry. Three lectures and 6 hours' laboratory work a week for 1 year.

Chemistry 11—Qualitative analysis. Two lectures and 6 hours' laboratory work a week for one-half year.

Chemistry 66—Quantitative analysis. One lecture and 6 hours' laboratory work a week for one-half year.

Chemistry 41-42—Organic chemistry. Three lectures and 6 hours' laboratory work a week for 1 year.

Chemistry 22—Physical chemistry. Three lectures a week for one-half year.

Zoology 1-2—Elementary biology and zoology. Two lectures and 4 hours' laboratory work a week for 1 year.

Zoology 91-92—General zoology. Two lectures and 6 hours' laboratory work a week for 1 year.

After September, 1920, the College will admit combined course students from other institutions to advanced standing upon the conditions, first, that they have fulfilled the educational requirement of the classes in the college to which they ask admission, especially as to this premedical equivalent of 72 points in Columbia College, second, that they have received a bachelor's degree for this work prior to their admission to the College of Physicians and Surgeons, and, third, that there are vacancies.

Columbia University will give the degree of Bachelor of Science in medicine to every student entering the College of Physicians and Surgeons on this standard upon the completion of the first two years of the medical course. Those students who elect the combined course of seven years in Columbia University will continue to receive the degree of A.B. upon the nomination of Columbia College.

Admission with Advanced Standing. Students will not be admitted to advanced standing upon examination, but only upon a satisfactory record in their school of previous residence. In addition to the medical student certificate required by the New York State Education Department, candidates who have completed, without conditions, one or more years of study in a medical school rated in class A, will be given credit for all courses satisfactorily completed therein, on presentation of proper certificates to the Committee on Admissions, covering the same; provided that the candidates before beginning the study of medicine have fulfilled the requirements for admission demanded by the College of Physicians and Surgeons. Application blanks will be furnished on request, and prospective students are advised to file their applications in the spring to avoid delay in matriculating at the opening of the session in September. It is essential that students offering themselves for admission to advanced standing should have had all the work completed by the class to which they seek admission at the College of Physicians and Surgeons.

Students planning to enter the second year from other medical schools must have completed the above entrance requirements before beginning the study of medicine, and one year in a class A medical school, including the subjects given at the College of Physicians and Surgeons. Conditional students from other schools may not remove a condition in the Summer Session at Columbia for credit in the College of Physicians and Surgeons.

The course in medical education divides itself logically into two parts, the first of which is scientific and consists of the first two years, and the second is clinical and consists of the last two years. It is found difficult to separate the work of the third and fourth years, and students who desire to obtain the advantages of the clinical opportunities offered in New York City, so far as they are represented by the College of Physicians and Surgeons, are recommended to transfer from their college of previous study at the end of their second year in medicine, and to take both the third and the fourth years at Columbia. Students who have finished the combined course leading to a bachelor's degree, of which the last two years have been taken in a regular medical school connected with their university, are eligible for admission to the third year at the College of Physicians and Surgeons, provided they have taken all the courses of its first two years.

The fourth year at the College is so eminently clinical that admission to it will be limited to students who have already secured the degree of doctor of medicine. It is believed that it will be found to be a valuable post-graduate year for many graduates of class A institutions.

Special Students. Students desiring to do special work at the College of Physicians and Surgeons may register at any time during the year as special students. Such special courses do not count in any way as part of the four years' course required of candidates for the degree of Doctor of Medicine.

Admission of Women. For the first time in the history of the College of Physicians and Surgeons, women were admitted to the first-year class in September, 1917, on the same basis as men, as candidates for the degree of M.D. In the future women will be accepted as students for advanced standing only in those classes to which women have been admitted already.

Graduation. Every candidate in the four-year course will be required before receiving the degree of M.D.:

1. To present satisfactory evidence, as required by law, of good moral character, and of having attained the age of twenty-one years.
2. To present evidence of having complied with the requirements for admission.
3. To have attained to satisfactory standing in the required studies of the four years of the curriculum. (See table, page 215.)
4. A candidate who shall have been admitted to advanced standing will be required to have spent not less than four academic years at the studies referred to in the clause next preceding; and to have complied successfully with the requirements for admission to advanced standing.

No two academic years which shall have begun during the same calendar year will be held to satisfy the requirements of the preceding clause.

Summer Session. A general statement of the work offered in the Summer Session will be found in connection with the statement of the Summer Session (see the Table of Contents of this volume), and a detailed announcement showing the scope of each course, the conditions under which it is given, and the fee charged, will be sent upon application to the Secretary of Columbia University. (See page 250.)

COMMITTEE ON INSTRUCTION

The Dean (Chairman), Professors BERKEY, JACKSON, MAYER, RAUTENSTRAUCH, RAYMOND, SLICHTER, and WENDELL.

Delegates to the University Council (see page 6).

The Trustees of Columbia University, in accordance with the unanimous recommendation of the Faculty of Applied Science, determined in 1912 to raise the requirements for admission to the Schools of Mines, of Engineering, and of Chemistry, and generally to elevate and strengthen the course of engineering and technical study, from and after July 1, 1914. These schools at that time became advanced or graduate schools to which students of any branch of engineering, who have had a suitable preliminary training in a scientific school or college, may come for the highest type of professional instructions and for training in methods of research.

Candidates for admission to the new courses are required to present evidence of such preliminary general education as can ordinarily be had only by taking at least three years of study in a college or scientific school of high rank.

The schools under the Faculty of Applied Science offer the following courses:

The School of Mines. Three-year advanced courses leading to the degrees of Engineer of Mines and of Metallurgical Engineer.

The School of Engineering and Chemistry. Three-year advanced courses in Civil Engineering, Electrical Engineering, Mechanical Engineering, and Chemical Engineering, leading to the degrees of Civil Engineer, Electrical Engineer, Mechanical Engineer, and Chemical Engineer, respectively.

The courses are intended to meet the requirements of the several professions indicated; and many of them permit a certain amount of specialization, particularly in the third year. The work in the School of Mines is so arranged that the student can emphasize the engineering, the metallurgical, or the geological side of his profession.

Candidates for a professional degree who have some special end in view may be permitted to vary the regular program by substituting other subjects offered under the Faculty of Applied Science.

Requirements for Admission. Admission to the Schools of Mines, Engineering, and Chemistry will be upon one of the two following conditions:

(a) The satisfactory completion of not less than three full years of study or the equivalent in an approved college or scientific school which course must have included adequate instruction in chemistry, mathematics, and physics and the first courses in drawing and mechanics, or

(b) In lieu of the above, candidates of mature years who may not be able to fulfill the requirements in every respect, but who have had a successful professional experience, may present such evidence as the faculty may require to prove exceptional fitness to undertake the study of engineering.

It is desirable that candidates for admission make application in the spring in order to ascertain whether it would be advisable to attend the Summer Session in July and August with a view of completing the requirements for admission.

Graduates of colleges and technical schools may be admitted to advanced standing by submitting evidence that they have satisfactorily completed courses required in the class or classes preceding the one for which application for admission is made.

Students who plan to do their college work elsewhere should apply without fail to the Secretary of the University for advice regarding the choice of their studies in order to make certain that they may be able to meet the new requirements for admission by the time their college work is completed.

Preparatory Courses in Columbia College. The attention of students who wish to pursue a course in the Schools of Mines, Engineering, and Chemistry is directed to the course in Columbia College, especially arranged for study preparatory to the work in engineering. See the current *Announcement of Columbia College*.

Special Courses. Graduates of the Schools of Mines, Engineering, and Chemistry, and of other institutions of equal grade, may pursue any subjects taught in the schools for which they are properly qualified.

Persons of mature age who are not graduates, but who show special qualifications, are sometimes permitted to pursue special courses, but this permission is not given to others.

SUMMARY OF PROFESSIONAL COURSES OF STUDY

NOTE: Detailed tabular arrangements of each year of these courses will be found in the current *Announcement of the Schools of Mines, Engineering, and Chemistry*.

ENGINEER OF MINES

The instruction during the first year includes fundamental training in physics, mechanics, chemistry, mineralogy, geology, and engineering, as outlined in the program of studies. Instruction in the second and third years includes mining engineering, metallurgy, and advanced geology, and certain subjects in civil, mechanical, and electrical engineering.

The engineering, mining, and metallurgical laboratories are equipped to train the student in the making of scientific tests of engineering materials, and working tests of machines and processes of ore treatment, thus preparing him, as far as it is possible in the school, for work that he will be called upon to do as an engineer.

Practical instruction in summer classes in the field is made an important feature of the curriculum.

While much time is given to practical training in the laboratories, in the field, and at the mines and metallurgical establishments, care is taken to subordinate this instruction to a high standard of accomplishment in class-room work.

MINING GEOLOGY

In response to the developments that have been going on for several years in the applications of geology, a new professional course has been arranged, leading to the degree of Engineer of Mines, but giving special importance to the subject of geology and its applications in mining and engineering problems in general.

This three-year course in mining geology is intended to train men for advisory and professional work in connection with all kinds of engineering and other operations involving a knowledge of ground structure and conditions, as well as for special studies of mineral resources, prospects, and mining conditions, or other formal geological investigations.

The first year of the course is identical with that of the regular mining engineering course. In the second and third years the mining geology schedule departs from the regular mining engineering schedule in the substitution of further geology courses in place of the more advanced courses in mechanical and electrical engineering subjects. All of the courses in the subject of mining are retained.

The summer work is devoted to training and experience in making geological observations and to practical geological work. The course is, therefore, fundamentally an engineering course, built upon the same requirements in general scientific training as the other engineering courses, but with an amount of training in geology to enable the graduates of this course to pursue independent studies of a geological nature in whatever field they happen to work. This type of training is specially suitable for professional geologists in all applied fields such as engineering and mining, where one must be able to view the problems from the engineering standpoint, rather than from the standpoint of pure science.

First Year. Winter Session: Chem. 181, Drafting 7, Elect. Eng. 101, Geology 5, Mechanics 103, Mineralogy 117, Physics 149.

Spring Session: Chem. 68, Geology 6, Mech. Eng. 100, Mechanics 104, Mineralogy 118.

tal subjects, especially in chemistry, physics, geology, mineralogy, and preliminary courses in engineering. In the second year instruction is given in metallurgy and in mechanical, electrical, and mining engineering, chemistry, mineralogy, and geology. The third year is devoted largely to advanced lecture courses and laboratory work in metallurgy, to important courses in mining engineering, and to the higher branches of engineering.

In the summer schools, instruction is given in general surveying, geological field work, and visits are made to metallurgical works. In the eight weeks' summer courses at metallurgical works the students are required to study processes, make dimension sketches of furnaces and mills, and by observation and instruction become acquainted with metallurgical operations as conducted at the time.

CIVIL ENGINEER

The purposes set forth in the General Statement are accomplished by instruction in the following list of subjects, the earlier of which are more fundamental while those of the last year are more professional in their character and scope. The subjects are so chosen as to accomplish broad educational training in the various fields of civil engineering. It will be observed that the effort is made to emphasize and ground the student in fundamental principles, especially in their applications to the practical matters of engineering work. The range of subjects is sufficient to cover essentially the manufacture and use of power; any structural work in iron and steel; masonry, including reinforced concrete; timber, and those constructions involving the consideration of the pressure and carrying power of earth. It will also be noted that the important subject of hydraulics is amply provided for by suitable topics covering public water supplies, flow in streams, natural and artificial, and hydraulic motors.

ELECTRICAL ENGINEER

The actual curriculum including the various requirements which must be fulfilled in order to obtain the degree of E.E. is given in the following list of studies for each of the three graduate years, the character of each subject or requirement being explained more fully in the departmental statement referred to. Before entering these three years of graduate study, the student is required to have a training in such fundamental subjects as mathematics, physics, chemistry, mechanics, and drawing, as outlined in the requirements for admission.

The three years outlined below are intended to include the more specialized professional instruction. However, even in these later years more advanced theoretical subjects, such as thermodynamics and electro-mechanics, are included and given most careful attention.

First Year. Winter Session: Chem. Eng. 161, 181, Elect. Eng. 101, 129, Mechanics 103, Metallurgy 131, Physics 149.

MECHANICAL ENGINEER

All subjects leading to the degree of Mechanical Engineer are listed in the following table, together with the year and term in which they are given. The first year is devoted to essential preparatory and introductory subjects, so treated as not only to prepare for later work directly but to give a survey of all that is to come. In the second year there are developed the basic principles of thermodynamics, resistance of materials and hydraulics, which are fixed in the mind of the student by drill, in the drafting-room by design courses, in the laboratory by experiments and tests, and in class by analysis of standard mechanical and electrical machinery. The third year is devoted to a detailed treatment of gas, steam, and water-power units and plants and to factory buildings, equipment, processes, and management. Throughout the course the aim is to develop clear conceptions of underlying principles, habits of independent thought and orderly mental procedure applicable to any sort of mechanical engineering problems rather than to the memorization of isolated facts. The training given not only fits the student to take up the design of machinery and the perfection of processes of doing things by mechanical means, but also to take ultimately a leading place in the management of the manufacturing and transportation industries as engineer or executive.

Spring Session: Business 2, Mech. Eng. 136, 146, 152, 158, 160, 168.

CHEMICAL ENGINEER

The courses of instruction leading to the degree in Chemical Engineering are carefully chosen with a view to training men to develop and direct those industrial and manufacturing operations and processes which are based upon the application of chemistry.

A general knowledge of civil engineering is obtained from courses in hydraulics and resistance of materials. Electrical applications are studied in the Direct and Alternating Current Laboratories with the electrical engineers. A study of steam and gas power machinery, pumps, turbines, blowers and hydraulic equipment in the mechanical engineering laboratories supplements the courses in general physics, thermodynamics, and hydraulics.

In addition to the training in the fundamental engineering courses, it is sought to advance the students' knowledge of chemistry into the fields of physical chemistry, organic chemistry, and the more important special applications of industrial chemistry.

During the final year much attention is given to the development of the skill of the student in the application of the fundamental, engineering, and chemical principles studied earlier in the course to the practical problems of the industry. The Chemical Engineering Laboratory is so equipped and managed as to develop the power of making direct application of previous training.

Graduates in Chemical Engineering obtain positions in works laboratories as assistants to superintendents of works, and assistants to designing and erecting chemical engineers, and in various other capacities calculated to develop the experience leading to the independent direction and management of manufacturing enterprises.

REGULATIONS FOR THE DEGREES OF MASTER OF ARTS AND DOCTOR OF PHILOSOPHY

In order to be admitted to the University under the Faculties of Political Science, Philosophy, or Pure Science, a student must hold a baccalaureate degree in arts, letters, philosophy, or science, or an engineering degree, from an approved institution, or have an education equivalent to that represented by one of these degrees.

Students are advised to ascertain, by addressing the Director of University Admissions, before coming to the University, whether the college from which the baccalaureate degree has been received is upon the list of institutions whose degrees are accepted by Columbia University as entitling the holder to admission under one of these faculties; or for a ruling upon an education claimed to be the equivalent of an acceptable Bachelor's degree.

A student who is graduated from a college which is not on the approved list should submit (1) an official transcript of his college record, showing the grades received in the several courses; and (2) a catalogue of his college in which he has marked (a) each of the subjects that he offered for admission, and (b) each course for which he has received credit toward the degree.

Students of mature age and special fitness whose previous education does not entitle them to admission as students under one of these faculties, may be admitted as students in the University, and, with the authorization of the Director of University Admissions, may register for courses under the control of these faculties. In general, students who do not hold the first degree or its equivalent are recommended to apply for admission to Columbia College, Barnard College, or the School of Practical Arts.

Every student is admitted subject to the disciplinary powers of the University.

No degrees are granted by the University for work done *in absentia* and a minimum residence in the University of one academic year is required of every candidate for a degree. A year of residence under the Faculties of Political Science, Philosophy, and Pure Science, is defined as attendance upon courses aggregating not less than thirty tuition points, distributed over a period of not less than one academic year or its equivalent. Four Summer Sessions or two Summer Sessions together with a Winter or Spring Session are equivalent to one academic year. In certain cases and by special arrangement time exclusively devoted to investigation in the field will be credited in partial fulfilment of the requirement of residence.

Students in Professional Schools. A student holding the required first degree who is primarily registered in a professional school of Columbia University, or in an allied professional school may, with the consent of the faculty of such school, be registered under the Faculties of Political Science, Philosophy, or Pure Science. In case such a student is accepted as a candidate for a degree, he must conform to all the rules and regulations of these faculties; but he may offer as the equivalent of fifteen tuition points for residence for the degree of Master of Arts or in part fulfilment of the residence requirements for the degree of Doctor of Philosophy such of his professional courses as may be approved for such purpose by the Dean. In accordance with this provision, it is the custom of the Dean to approve only those professional courses which have been accepted by the several departments under these faculties and approved by them and the University Council.

REGULATIONS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

A student admitted to the University under the jurisdiction of the Faculties of Political Science, Philosophy, or Pure Science, who wishes to become a candidate for the degree of Doctor of Philosophy will be matriculated by the Dean upon the recommendation of the department in which his research work lies. Departments will recommend students for matriculation upon the following conditions:

1. The student must have pursued graduate studies in residence in this University or in some other institution approved by it for the equivalent of at least one academic year as defined in the regulations of the University.
2. The student must have satisfied the department that he is proficient in such languages as it may under the rules of the Faculty prescribe.
3. The student must have satisfied the department that he is prepared to undertake researches under its direction.

The Dean will admit a candidate for the degree to final examination and appoint a committee to examine him upon the recommendation of the department in charge of his work. Departments will recommend candidates for examination upon the following conditions:

1. The candidate must have pursued graduate studies and research for at least two academic years, one of which must have been spent at this University. The years of graduate study prior to his matriculation may be accepted in part fulfilment of this condition.
2. The candidate must have satisfied such preliminary examinations or requirements as the department may demand.
3. The candidate must have prepared a dissertation approved by the department and embodying the results of his researches. This dissertation must be printed either prior or subsequent to the final examination, as the department may require.

Students are advised to consult the divisional announcements and the administrative officers of the departments under which they are pursuing their studies, concerning the departmental requirements for admission to candidacy and for final examination.

Applications for the final oral examination for the degree of Doctor of Philosophy must be filed with the Dean at least two months before one of the three dates at which diplomas are issued (*viz.*, October, February, and June), in order to secure examination before that date.

Each candidate for the degree of Doctor of Philosophy shall present a dissertation embodying the results of original investigation and research on some topic previously approved by the professor in charge of the major subject. When such dissertation has been approved, it shall be printed by the candidate, and 100 copies shall be delivered to the Librarian of the University before the degree is conferred. For reasons of weight and on the recommendation of the department concerned, the Dean may suspend this requirement if the dissertation has been accepted by a reputable scientific journal and publication within a period of two years has been assured. The Dean may, when he deems it necessary, demand a financial guaranty of eventual publication. On the title-page of every such dissertation shall be printed the words, "Submitted in partial fulfilment of the requirements for the degree of Doctor of Philosophy, in the Faculty of —, Columbia University;" the full name of the author; the full title of the dissertation; the year and place of imprint, and, if a reprint, the title, volume, and pagination of the publication from which it was reprinted. There shall be printed and appended to each dissertation, in the form of a Vita, a statement of the place and date of birth of the author, of the educational institutions that he has attended, and a list of the degrees and honors conferred upon him, as well as the titles of his previous publications.

Under the Faculty of Political Science, the dissertation is required to be printed before the final examination is held.

Under the Faculties of Philosophy and Pure Science, the dissertation is not required to be printed until after the examination of the candidate. Students should, however, at least three weeks prior to their examination, deposit three typewritten copies of the dissertation in the Dean's office for the inspection of the examiners.

The general examination for the degree of Doctor of Philosophy will not be confined to the courses which the candidate has attended in Columbia University or elsewhere, or even to the field covered by such courses. The candidate is expected to show a satisfactory grasp of his subject as a whole and a general acquaintance with the broader field of knowledge of which this subject forms a part.

MASTER OF ARTS

A student regularly admitted to the University under the Faculties of Political Science, Philosophy, and Pure Science and accepted as a candidate for the degree of Master of Arts will be recommended for the degree after the following requirements have been satisfied:

1. The candidate shall have registered for and attended courses aggregating not less than thirty tuition points,¹ distributed over a period of not less than one academic year or its equivalent.
2. The candidate shall have satisfied the department of his choice that he has completed all the requirements specified by the department for the degree. These requirements may include the completion of courses and the assigned work in them, examinations, an essay, seminars, or other work prescribed by the department.

Students are advised to consult the divisional announcements and the administrative officers of the departments, under whom they are pursuing their studies, concerning the departmental requirements for the degree.

Candidates for the degree of Master of Arts in the Department of Education are under the jurisdiction of the Faculty of Education at Teachers College. (See the current *Announcement* of that Faculty.)

A candidate for the degree of Master of Arts in satisfying the requirement of residence may not offer in excess of fifteen tuition points courses which he also offers for a professional degree or for a certificate given in lieu thereof in any professional school belonging to the University or affiliated with it.

Each candidate for the degree of Master of Arts must file a formal application for the degree on a blank provided for the purpose, to be had of the Registrar. If the degree is to be conferred in February, the application must be filed with the Registrar on or before December 1; if in June, on or before March 1; if in October, on or before August 1. The last named date applies to candidates who shall complete the requirements of residence and attendance in the Summer Session then in progress. Diplomas are issued on the last Wednesday in February, on Commencement day, and on the last Wednesday in October, corresponding, respectively, to the foregoing dates of application.

When an essay is required, it shall be submitted to the appropriate department at such time as the department may designate. If the essay is accepted, two typewritten or legibly written copies, together with a certificate of acceptance by the professor in

¹ Students accepted as candidates for the degree prior to July 1, 1917, will be expected to complete a minimum residence requirement (exclusive of the essay or its equivalent) of twenty-eight tuition points instead of thirty. Courses completed by them prior to July 1, 1917, will be accepted at the rating of two points for a half course, four points for a full course, and eight points for a double course. Courses selected after that date will have the point rating assigned to them in the *Announcements*.

charge, shall be deposited with the Registrar at least two weeks before the candidate expects to receive his degree. These copies must be written on 'Paragon Linen', 11 x 8½ inches in size, 20-pound weight, 4½ wove, a space of 1½ inches on the inner margin being left free from writing. The title-page shall contain the words: "Submitted in partial fulfilment of the requirements for the degree of Master of Arts in the Faculty of —, Columbia University."

An undergraduate who, at the beginning of any Session, is within twelve points of a Bachelor's degree may be permitted, with the approval of the appropriate Deans, to register for graduate courses not in excess of four tuition points with a view to offering them in part fulfilment of the requirement for residence for a second degree; if within eight points, courses not in excess of eight tuition points; if within four, not in excess of twelve. If such student afterwards matriculates as a candidate for the degree of Master of Arts, the graduate courses previously taken by him under this provision will be accepted in part fulfilment of the residence requirement for the degree.

On final certification by the Dean of the appropriate Faculty that all official regulations have been complied with, a candidate shall be recommended to receive the degree of Master of Arts for the satisfactory completion within a period of five years of an approved curriculum.

MASTER OF LAWS

Any student who has been graduated from an approved college or scientific school of collegiate rank, or who has successfully completed three years of undergraduate study in an approved college or scientific school, such course of study including satisfactory courses in Economics and in English and American History, and who has also successfully completed three years of study in an approved law school, and who shall thereafter during one year of residence at Columbia University satisfactorily complete a course of study approved by the Dean of the Faculty of Law shall be entitled to be recommended for the degree of Master of Laws.

MASTER OF SCIENCE

The degree of Master of Science is awarded as a graduate professional degree under the Faculty of Applied Science, the Faculty of Practical Arts, the School of Architecture, and the School of Business. For information with regard to candidacy for this degree application should be made to the Dean or Director of the Faculty or School concerned.

Delegates to the University Council (see page 6).

General Statement. Teachers College, founded in 1888, and chartered by the regents of the University of the State of New York in 1889, became, in 1898, a part of the educational system of Columbia University. The President of Columbia University is President, *ex-officio*, of Teachers College and the College is represented in the University Council by its Dean and representatives elected from its two Faculties. The College, meanwhile, maintains its separate corporate organization, and its Board of Trustees continues to assume entire financial responsibility for its maintenance. In 1912 the Trustees reorganized the faculty of Teachers College, establishing a Faculty of Education and a Faculty of Practical Arts. By this reorganization, Teachers College now consists of two Schools, the School of Education and the School of Practical Arts.

The central group of the Teachers College buildings occupies the block directly north of the University Campus, bounded by 120th and 121st Streets, Amsterdam Avenue, and Broadway. It includes the Main Building, containing equipment for administration and instruction and the Bryson Library—the educational library of the University—adjoined by the Milbank Memorial Building, housing a number of academic and technical departments and containing the Memorial Chapel; by the Macy Manual Arts Building, with its equipment for work in Fine Arts and Industrial Arts; and by the Household Arts Building. The Frederick Ferris Thompson Memorial Building, for

the department of physical education, connects the Milbank Building on the west with the main building of the Horace Mann School. To the east in this group of buildings is Whittier Hall, one of the residences for the women students of the College.

The new buildings of the Horace Mann School for Boys, a country day school, are located near Van Cortlandt Park. The Speyer School is situated a short distance north of the College, on Lawrence Street, near Amsterdam Avenue. The Lincoln School, the new experimental school of Teachers College, which was opened in 1917, occupies buildings at 646 Park Avenue and at 56 East 67th Street.

Two apartment houses have recently been purchased and converted to dormitory uses. One of these, Bancroft Hall, is on the north side of 121st Street, opposite the Household Arts Building; the other, Seth Low Hall, is situated at the corner of 121st Street and Morningside Drive.

School of Education. The School of Education affords opportunity for the advanced study of educational psychology and sociology, the history and philosophy of education, educational administration, vocational, religious, and rural education, and the various aspects of secondary, elementary, and kindergarten education. It also provides professional training, both theoretical and practical, for teachers of both sexes for secondary, grammar, and primary schools, and kindergartens; and offers preparation for advanced students for work as principals, supervisors, and superintendents of schools; as heads of academic or educational departments in normal and teachers' training schools, and of educational departments in colleges and universities. The School of Education is thus a professional school of Columbia University for the study of education and the training of teachers, taking academic rank with the Schools of Law, Medicine, Mines, Engineering, and Chemistry.

Curricula. Since July 1, 1914, the School of Education has been organized on a graduate basis offering graduate curricula for advanced students leading to the Teachers College diplomas in teaching, and to the degrees of Master of Arts and Doctor of Philosophy with a major subject in education. Such curricula provide work in educational psychology, the history and the philosophy of education, educational sociology, educational administration, vocational, religious, and rural education, secondary education, elementary and kindergarten education, and in research in the methods of teaching the various academic subjects, supplemented by courses in other parts of the University. Teachers College diplomas are awarded to those who demonstrate professional fitness as instructors in education in colleges and universities, as supervisors, principals, and superintendents of schools of all grades, as heads of academic or education departments in normal and teachers training schools, and as teachers in secondary schools. Courses in education may also be counted as minor subjects toward the advanced degrees, by students primarily registered in some other part of the University.

The Horace Mann Schools, maintained by Teachers College, with a complete organization covering the work of the kindergarten, elementary school, and junior and senior high school, offer exceptional advantages for the study of the practical work of teaching and for the investigation of educational problems. These schools now have an attendance of about 1,200 pupils.

The Speyer School, in connection with Public School No. 43, is conducted as an experimental junior high school under the Board of Education of New York City, in cooperation with Teachers College.

The Lincoln School, established in 1917, is maintained by the General Education Board in cooperation with Teachers College. The school exists for the purpose of conducting modern experiments in education.

School of Practical Arts. The School of Practical Arts was established to provide in the University system a new type of collegiate education, uniting liberal with technical

training, and to prepare special teachers of such technical subjects as household arts, industrial arts, fine arts, music, physical education, and nursing.

The School offers to both men and women, who have completed a secondary school course, a program of study four years in length, equivalent in standards of admission and graduation to the traditional college course in letters and science. It includes in its program general cultural subjects, by which any particular curriculum may be enriched and extended, and offers, therewith, a broad and generous technical training, based on adequate instruction in science or the arts, by which the student may receive a high type of vocational preparation in the varied fields falling within the scope of the School—in industrial arts, household arts, dietetics, institutional work, public health, fine arts, the art industries, music, and physical training.

The School of Practical Arts is organized as a School of full University grade parallel to the Colleges of the University; it enjoys all the privileges of University membership, and its graduates receive the credentials of the University.

Admission. Students holding a diploma of graduation from an approved high or secondary school are admitted to the School of Practical Arts on certificate from the principal, provided the high school course has covered four years' work and has included certain fundamental courses in English, history, or foreign languages, and mathematics or science.¹ Application for admission should be made as far in advance of the desired time of entrance as is practicable, and must include statements from responsible persons that the candidate possesses the qualities of health, character, scholarship, and serious purpose required for successful work in the School of Practical Arts. The application should be made on a blank form which will be sent on request. Candidates similarly vouched for may also be admitted on examination of the College Entrance Examination Board or the University Committee on Admissions of Columbia University, or on credentials from the Department of Education of the State of New York.

The School reserves the right to restrict admission to the freshman year to the number of 150, and to select these according to merit.

Advanced standing may be granted to students who have completed, in an approved college, technical school, normal school, or training school, courses in advance of high school graduation. Application for admission to advanced standing should be made on a blank form which will be sent on request. For further information in reference to the requirements for admission see page 194.

Program. The courses of study leading to the bachelor's degree occupy four years of work (124 points), for which the usual secondary school education is a required preparation. During the four years of study, approximately one-third of the student's time must be spent in general academic subjects (45 points), approximately one-third in technical subjects and professional training (45 points); the remainder (except for four required points in hygiene and physical training) of the 124 points needed for the degree must be distributed, according to the needs of the students, in either the general or the technical field. The program of study thus requires of all students a certain amount of fundamental general training in academic studies, but allows a freedom of election beyond the minimum requirements; it offers freedom of election in the choice of a group of studies of major interest, but requires systematic and progressive study in the group elected. A two-year professional curriculum leading to the degree of Bachelor of Science and preparing for teaching the Practical Arts is also offered to students who enter with two years of professional, technical, or collegiate training beyond high school. For detailed information, see the current *Announcement of the School of Practical Arts*, which may be had from the Secretary of the University.

¹ All candidates for admission are required to offer 15 units, to include: English, 3 units; mathematics or science, 2 units; foreign languages or history, 2 units; electives, 8 units.

Degrees. The successful completion of the four years' course of study is recognized by the conferring by Columbia University of the degree of Bachelor of Science.

Graduate students in the field of practical arts are received into the various departments of Teachers College as candidates for the degree of Master of Arts, Master of Science, or Doctor of Philosophy.

For other officers who may give instruction to students of Barnard College, consult the several departmental statements.

Delegates to the University Council (See page 6).

General Statement. In 1883 the Trustees of Columbia College offered degrees to women who should be able to pass the necessary examinations, without, however, providing instruction for them. The resulting system, called the Collegiate Course for Women, proved unsatisfactory to both parties. Barnard College was, therefore, organized in 1889 to provide instruction for women which should be identical with or equivalent to that provided by Columbia for men.

For eleven years it duplicated for women as far as possible the curriculum of Columbia College, and also registered for graduate work under the University Faculties women who held the bachelor's degree from institutions of good standing. Its instructors were members of the University staff. Examinations for entrance, those given in course, and those for degrees, were conducted by Columbia University. During the first three undergraduate years separate instruction was given to women; in the senior year they were admitted to certain courses in the University. Graduate students attended many courses at the University under the Faculties of Philosophy, Political Science, and Pure Science, the laboratory work in science being done at Barnard College.

The numerical growth of Barnard College made inappropriate, however, the informal arrangement for instruction which was the natural method at the outset, and it became necessary to recognize formally the status which had gradually come into existence. An agreement was accordingly entered into in January, 1900, by which Barnard was included in the University system. Barnard is now an independent college for women with a corporation and a faculty of its own vested with all the powers commonly belonging to such bodies. At the same time, it shares the library, the instruction, and the degrees of Columbia University.

A more exact idea of the relations between Barnard College and Columbia University and also of the relations between Barnard College and Teachers College is to be found in the current *Announcement of Barnard College*. This may be obtained without charge upon application to the Secretary of Barnard College.

ADMISSION (See Table of Contents)

Probation. A candidate for admission who has not secured the prescribed 15 units may be admitted to the freshman class with conditions, if in the judgment of the Committee on Admissions she is qualified to undertake the work of the class. General

deficiency in any prescribed subject will disqualify for admission. Except for reasons of weight, a student who has failed to complete a course in a good high school or preparatory school will not be admitted with conditions.

A student admitted conditionally or by credentials from another college or from the State Education Department will be held under probation during the first winter or spring session of residence. For a detailed statement regarding the conditions of probation, see the current *Announcement of Barnard College*.

Advanced Standing. See the "Requirements for Admission to Advanced Standing in Columbia College."

In addition, the credits granted in any subject to a student admitted with advanced standing may be withdrawn or diminished in amount if, in pursuing such subject, after admission to Barnard College, the student proves that the granting of the credits was wholly or in part unwarranted by her previous work.

No student may receive a degree who has resided less than two full sessions (winter or spring) at Barnard College.

No applicant will be allowed to enter the senior class as a candidate for a degree after October 15 in any year.

Special Students. Candidates for admission as special students must make application in writing at least one week before the first day of the entrance examinations in September or in January. Proper blanks for this purpose may be obtained from the Secretary.

Special students in Barnard College are of two classes: matriculated and non-matriculated.

Matriculated special students are women who wish, without taking a degree, to make a serious study of some subject or group of subjects. They must pass the regular examinations for admission to the freshman class and have full credit for 15 units of the entrance requirements. They may, therefore, in event of a change of plan be credited with such of their courses as may coincide with the courses leading to a degree.

Non-matriculated special students must be women of mature age who wish to pursue chiefly advanced courses of special study. They may be admitted at the discretion of the Committee on Admissions without passing formal entrance examinations, but must furnish proof that they have at some time pursued the studies included in the matriculation examinations and must satisfy the requirements of the department that they desire to enter. Candidates desiring to pursue merely elementary courses, as in languages, etc., will not be admitted as non-matriculated special students. Ordinarily, no work done by a non-matriculated special student may count toward a degree.

Information regarding the regulations governing the election of studies, amount of work, attendance, examinations, etc., of special students is contained in the current *Announcement of Barnard College*.

Matriculation, Registration, Fees. Detailed information regarding matriculation, registration, and fees will be found in the current *Announcement of Barnard College*.

DORMITORY (See page 76)

Program of Studies. Upon completion of a curriculum arranged according to the plan to be described below, the student is recommended by the Faculty of Barnard College for the degree of Bachelor of Arts.

Beginning with the class entering in September, 1919, the following new curriculum will go into effect, taking the place of the old literary course leading to the A.B. degree and the natural science course leading to the B.S. degree:

Economics A	6 points
English A	6 points
English X	0 points
History A	6 points

A sound knowledge of French or German. Students must demonstrate to the Department of Romance Languages or the Department of Germanic Languages (a) their ability to read at sight either French prose or German prose of ordinary difficulty, and (b) their ability to understand spoken French or spoken German and to use the language in expressing connected ideas. In addition to the foregoing requirements students must have such sound acquaintance with one other foreign language, ancient or modern, as would be equivalent to not less than 3 entrance units in the language, ancient or modern, as would be equivalent to not less than 3 entrance units in the language, such proficiency to be determined by entrance examinations, by special tests, or by specific College courses, recommended for that purpose by the departments concerned under the approval of the Faculty.

Preparation for Professional Schools. Students who intend to transfer to professional schools are of two classes, those who leave Barnard at the end of the sophomore year, without candidacy for the Bachelor of Arts degree, and those who at the end of the junior year wish to take advantage of the 'combined course', counting the first year of an approved professional school in place of the senior year at Barnard.

Barnard students intending to transfer to professional schools without candidacy for the degree of Bachelor of Arts are required to take English A, English X, Physical Education throughout their stay at Barnard, and such other courses as are appropriate in preparation for the professional school to which the transfer is to be made.

Barnard students intending to enter approved professional schools after three full years of work at Barnard College may substitute the first year of the professional schools for the senior year at college and, on satisfactory completion thereof, become candidates for the degree of Bachelor of Arts, provided that, before such transfer is made, 90 points of work, including all prescribed work, 18 points of the major subject and electives distributed according to certain rules, have been satisfactorily completed.

University Courses. Certain courses in the School of Architecture and the Department of Music and in Teachers College are open to regular students registered in Barnard College. Certain graduate courses in Columbia University under the Faculties of

¹ Or, on recommendation of the department, Philosophy 61-62.

Political Science, Philosophy, Pure Science, and Education, and other courses in the Union Theological Seminary and the New York School of Philanthropy are open to specially qualified Barnard seniors.

After two years of collegiate work in Barnard a student may transfer without examination to the School of Architecture as a candidate for the degree of Bachelor of Architecture, to Teachers College as a candidate for the degree of Bachelor of Science in Practical Arts, to the School of Business as a candidate for the degree of Bachelor of Science, or to the School of Journalism as a candidate for the degree of Bachelor of Literature; after three years (or two in exceptional cases) to the College of Physicians and Surgeons as a candidate for the degree of Doctor of Medicine.

Detailed information in regard to these opportunities will be found in the announcements of Barnard College and the other schools concerned.

SCHOOL OF ARCHITECTURE

ADMINISTRATIVE BOARD (See page 10)

Delegate to the University Council (See page 6)

The School of Architecture of Columbia University is a professional school for men and women designed to train its graduates for the active practice of architecture. Founded in 1881, under the direction of Professor William R. Ware, as a department of the School of Mines (now the Faculty of Applied Science), it was in 1902 made an independent school.

It receives two classes of students: (1) Candidates for the degree of Bachelor of Architecture, who must give evidence of having completed two years of academic study in a recognized college. The curriculum offered to such students is of indeterminate duration but may generally be covered in four years. (2) Candidates for the degree of Master of Science in Architecture. Candidates for this degree must be graduates of this School of Architecture or of a school of architecture maintaining equivalent courses, and are required to spend not less than one academic year upon work assigned by the Administrative Board of the School of Architecture.

Building and Equipment. In 1912 the School of Architecture took possession of its present quarters in Avery Hall, erected in memory of the late Samuel P. Avery, a benefactor of the University, and of his son, the late Henry O. Avery, an architect, to accommodate the Avery Architectural Library and the School of Architecture. Three floors of the building are occupied by the School.

The Avery Architectural Library, consisting of about 25,000 volumes relating to architecture and the allied arts in the country, occupies the ground floor of the building, and is open to the public daily (except Sundays and holidays) from 9 a. m. to 6 p. m., and on Wednesdays until 10 p. m. Its material is available for the purposes of study and illustration in the School, whose students are freely admitted to its alcoves without restriction upon the use of documents for drawing, tracing, and photographing.

In addition to this the School possesses, in its own departmental library, a collection of about 18,000 photographs and several hundred books, a classified library of many thousands of prints and plates, and a large number of original drawings from various sources. The equipment of illustrative material furthermore comprises 16,000 lantern slides of architectural subjects, a fine collection of casts of architectural details, including a large number from ancient and modern Roman buildings, the gift of the late Charles F. McKim, and several valuable models of buildings and of structural details. A smaller working library of books of constant reference, plates, and periodicals, is maintained in conjunction with the drafting-rooms on the upper floors.

Periodic exhibitions of both student and graduate work are held by the School of Architecture. The current work of students in residence, illustrating progressive accomplishments during four years, is hung in the exhibition room and corridors of Avery Hall.

Important collections of sculpture, painting, engraving, and the minor arts are frequently shown in the Avery Architectural Library, and in addition there are bibliographic and educational exhibitions in the University Library and at Teachers College.

The Willard collection of architectural casts and models in the Metropolitan Museum of Art is open every day and two evenings in the week, and is very useful for illustrating the historic styles and sketching cards granting certain additional privileges in the Museum are issued to students.

The other collections of the Metropolitan Museum of Art and those of the American Museum of Natural History furnish much admirable illustrative material; while the building activity of the city forms a chronicle of architectural progress in design and construction, governmental, domestic, monumental, ecclesiastic, and commercial.

Admission. Except by special action of the Committee on Admissions, regular students under eighteen are not admitted. For regulations governing admission to the course for the Bachelor's degree in Architecture and for the degree of Master of Science in Architecture, see Table of Contents.

In general, all courses in the School of Architecture begin in September and run through the year, although the two Sessions are separately marked. It is, therefore, extremely difficult to make adequate arrangements for students who wish to enter in February.

Students desiring to enter with credit for courses pursued in other institutions must make application in writing to the Director of the School of Architecture in time to reach him one month before the beginning of registration (see Academic Calendar). The general regulations as to documents to be submitted and as to the acceptance of certificates are the same as for the Schools of Mines, Engineering, and Chemistry.

FEES (See page 70)

FELLOWSHIPS AND SCHOLARSHIPS (See page 289)

Examinations. Regular examinations in each course are held at the end of each half year. All other examinations, except examinations for admission to advanced standing are special examinations, for which the statutory fee of \$5 is charged (see page 71). For the dates of the various examinations see the Academic Calendar. Absence from any regular or delinquent examination for which a student is registered is regarded as a failure. A student who fails to attend any mid-year examination will be excluded from the second term in that subject, except for reasons of weight. Those for whom exceptions are made will be required to take the corresponding deficiency examinations during the stated September deficiency examination period.

Students who do not pass or are debarred from a regular mid-year or final examination must remove such deficiency at the September delinquent examinations, failing which they must repeat the course concerned. Students will be debarred from examinations for excessive absence from lectures or failure to complete collateral work. They may for the same reasons be excluded from any course at the middle of any term.

Bachelor of Architecture. 1. Candidates for admission to this course must give evidence of having successfully completed the equivalent of two years of academic studies in a recognized college. Mathematical studies pursued in anticipation of those prescribed in the School of Architecture may be included in such collegiate preparation, and students are advised to carry these studies if possible through the Calculus. The required collegiate preparation must include the equivalent of the elementary French used for admission to Columbia College. Candidates must also show a practical knowledge of freehand drawing.

2. In case of studies pursued elsewhere than in a recognized college, and offered by the candidate as an equivalent for any part of the college preparation, the Administrative Board of the School will determine each equivalent upon its merits.

3. Through the cooperation of the Staff of the School of Architecture and the Committee on Instruction of Columbia College, a program for a combined course of six years has been arranged. Its object is to enable students in Columbia College to begin the study of architecture early in their college course and to obtain unbroken training in this field until they receive the professional degree. Upon completing the fourth year of this curriculum students receive the degree of Bachelor of Arts and at the end of the whole course, the degree of Bachelor of Architecture. The combined course has decided

advantages in soundness of preparation and breadth of culture and it is earnestly commended to young men in preparatory schools who look forward to the study of architecture. Copies of this program may be obtained on application to the Director of the School or to the Dean of Columbia College.

Program of Studies. A student receives his degree when he has satisfied the requirements of the courses scheduled below.

Not more than 16 points, exclusive of Elements of Architecture or Design, may be taken in any term, except by authority of the Committee on Instruction of the School.

In connection with this schedule of required work it should be understood that students credited with advanced standing on the basis of work done in other institutions, as well as others especially qualified, may in any year undertake in part the work of more advanced years subject to the restriction stated above.

Associate Dean DIEKMAN.

Professors ARNY, BALLARD, BASTEDO, CHANDLER, COBLENTZ, CURTIS, GIES, HOSTMANN, JESSUP, PACE, and WIMMER.

OTHER OFFICERS OF INSTRUCTION

LEWIS N. BROWN, Phar.D., *Instructor in Pharmacy*; HUGO H. SCHAEFER, Phar.D., *Instructor in Chemistry*; FANCHON HART, Ph.G., *Instructor in Materia Medica*; HAROLD MACADAMS, Ph.C., *Instructor in Analytical Chemistry*; C. B. COUCHMAN, C.P.A., *Instructor in Accounting*; PAUL BURROUGHS, LL.B., *Instructor in Law and Accounting*.

Delegate to the University Council (See page 6).

General Statement. The College of Pharmacy of the City of New York, founded in 1829, chartered in 1831, and recognized in 1879 by the Regents as part of the University of the State of New York, became a member of the educational system of Columbia University on July 1, 1904. The President of the University is *ex-officio* President of the College of Pharmacy, and the College is represented in the University Council by its Dean, who is appointed by the Trustees of the College of Pharmacy on the nomination of the President. The College, however, maintains its separate corporate organization, and its Trustees continue to provide for its financial support.

The College is situated at 115 West 68th Street, near Columbus Avenue, in an especially well-equipped building erected in 1894.

The College of Pharmacy is thus the professional school of Columbia University for Pharmacists, Pharmaceutical Chemists, Bachelors of Science in Pharmacy, and Doctors of Pharmacy and, as well, a valuable addition to the University's resources for teaching and research in botany, chemistry, pharmacy, and materia medica.

Admission. Candidates for admission will be examined either at the Regents' examination, or at the January and September entrance examinations of Columbia University, or of the College Entrance Examination Board, held in June of each year (see page 194).

College Course. The College Course of two years leading to the degree of Graduate in Pharmacy is open only to persons holding the Qualifying Certificate for a Pharmacy Student, granted by the State Education Department for thirty Regents' counts or their equivalent.

University Course. The University Course, leading in three years to the degree of Pharmaceutical Chemist and in four to that of Bachelor of Science in Pharmacy is open only to persons who have completed a four-year approved course in a registered high school of New York State or have passed the Entrance Examinations of Columbia University or the College Entrance Examination Board.

Program of Study. 1. A College Course, consisting of two years, leading to the degree of Graduate in Pharmacy, conferred by the College independent of the University, and qualifying the graduate to meet any examination for the position of licensed pharmacist.

The work undertaken is as follows: First year, physics, general and pharmaceutical chemistry, analytical chemistry; practical pharmacy, dispensing pharmacy, botany, microscopy, physiology, posology, and pharmaceutical accounting. Second year: organic chemistry, inorganic and organic pharmaceutical chemistry, and analytical chemistry, practical pharmacy, dispensing pharmacy, materia medica, toxicology, macroscopical pharmacognosy, microscopical pharmacognosy.

2. A University Course of four years, the first three of which lead to the degree of Pharmaceutical Chemist, conferred by the University. The work undertaken in this course differs from that of the College Course in being of a somewhat more advanced character, and in being pursued through the full academic year. It includes instruction in laboratory physics, in addition to the studies of the College Course. The fourth year leads to the degree of B.S. in Pharmacy. The work for this year includes micro-analysis, plant analysis, bacteriology and physiological chemistry, as well as advanced work in all departments.

3. A third or Graduate Course of two years leads to the degree of Doctor of Pharmacy.

The work of the Graduate Course is arranged on the same plan as that leading to the degree of B.S. in Pharmacy, and occupies not less than forty hours weekly throughout the entire academic year, a fraction of this work being elective.

The purpose of this course is the training of men and women for the higher duties of pharmaceutical and allied service, such as pharmaceutical and commercial analysis, food and drug inspection, and commissionship and pharmaceutical teaching.

The baccalaureate degree, secured on equal terms with that conferred in other professions, confers equal privileges therewith, except as to the number of units of work performed. A holder of this degree desiring to transfer his activities to another profession, or to study for a higher degree, will be credited in such course with the number of units pertaining to his Bachelor of Science in Pharmacy Course, and his standing up to this point is the same as that secured in other baccalaureate departments.

4. A Summer Laboratory Course of twelve weeks is provided for those who, for any reason, require training in special subjects.

5. Evening courses of instruction are offered for the benefit of special students, and for any of our regular students who for any reason may desire the instruction. These courses cannot, at least for the present, take the place of any instruction of the regular course, leading to any of our degrees. Certificates will be awarded to those who successfully pursue these evening courses.

6. A number of special courses of instruction have also been established, partly for the benefit of those regular students who desire, for any reason, to specialize in certain lines of work, and partly to provide instruction in individual departments for those who do not desire to take the full course. Certificates, but not diplomas, are awarded to such students. These special courses of instruction are in pharmacognosy, chemical analysis, advanced inorganic and organic chemistry, and practical pharmacy.

Method. During the first two undergraduate years the instruction occupies three days of the week, the alternate days being free for practical experience in the pharmacy. This arrangement provides a means of paying the expenses of a majority of students.

Many students, under the advice of the Faculty, prefer to devote their entire time to college work. For those so desiring, additional instruction is provided.

In addition to lectures and laboratory work, a series of recitations or quizzes, by a corps of qualified instructors, is given to the classes, in small sections.

THE SCHOOL OF BUSINESS

ADMINISTRATIVE BOARD (See page 10)

Delegate to the University Council (See page 6)

General Statement. The School of Business offers a complete professional course in business to properly qualified students, both men and women. The aim of the course is to afford a sound knowledge of fundamental business facts and principles in addition to such practical training in business methods as a school furnishes. The courses are designed especially for the college student who at the close of his sophomore year may desire to secure a more thorough and exact knowledge of the principles, organization, and methods of the commercial, industrial, and financial world than is furnished in other departments of the University, and for those persons already engaged in business who desire to obtain deeper insight into the problems of their respective vocations as well as broader knowledge of allied fields of business activity. One of the objects, also, is to prepare students directly for the state examinations for the certificate of certified public accountant.

Curriculum. The curriculum will consist of a two-years' series of courses based upon two years of college study leading to the bachelor's degree with an additional year leading to the master's degree.

Students. The following classes of students will be provided for: (1) graduate students, candidates for the higher degrees; (2) students who have spent two years in Columbia College or Barnard College or in some other college of equivalent rank and are graduates for the degree of Bachelor of Science; (3) graduates of high school who have completed in the Department of Extension Teaching work equivalent to that offered at Columbia College or Barnard College in the first two years; (4) students who have completed two full years of satisfactory collegiate work in an acceptable college and desire to take special courses, not as candidates for a degree; (5) students over twenty-one years of age actively engaged in business and qualified to undertake certain courses, who may be admitted as special students but not as candidates for a degree; (6) students who have had a full secondary education or its equivalent, who may enter the evening courses in business offered by the Department of Extension Teaching and become candidates for a certificate, obtainable in two years through the completion of courses representing 48 points of work.

Admission. 1. *To the four-year course (two years in college and two in the School of Business):* Students should enter Columbia College or Barnard College, taking entrance examinations.

2. *To the two- or three-year course of the School of Business:* Two years of Columbia or Barnard College or an equivalent course in some other institution of similar standing. During this period the student should take courses aggregating 64 points if taken in Columbia College or Barnard College, or two full years of work in another acceptable college, including two years of English, two years of French or German or Spanish or their equivalent and at least one year each of history, economics, commercial geography, and mathematics. For reasons of weight and on the approval of the Director, students will be allowed to make good during their first year in the School of Business certain courses usually required in the preliminary years.

3. *To the evening courses in business in the Department of Extension Teaching.* A complete high school course. No entrance examination is required.

4. *Special students.* Students who have completed two full years of satisfactory collegiate work in an acceptable college may be admitted to certain courses of study.

5. *Non-matriculated students.* Students who are over twenty-one years of age and who are actively engaged in business may be admitted to special courses of study, but such courses may not ordinarily be counted toward the degree of Bachelor of Science in Business.

PROGRAM OF STUDIES

BUSINESS

First year. The first year of the School of Business corresponds to the third year of the college course and is, therefore, open to students who have covered two years of collegiate subjects.

The following courses are required of candidates for the degree of Bachelor of Science in Business and must be taken in the first year:

- First year accounting
- Public aspects of business or economic history of the United States
- Business organization and administration
- Money and banking or corporation finance
- French or German or Spanish

aggregating not less than 24 points, and electives to make a total of not more than 36 points.

Second year. Students of the second year of the School of Business are permitted to elect their entire program, subject to the approval of the Director. They should have gained a satisfactory working knowledge of accounting before completing the second year of the School. This will ordinarily require two years of attendance upon Business 23-24 and Business 25-26. Those who wish a general course in business may make a selection which stresses no particular branch. On the other hand, those who desire to specialize in some part of the field are afforded an opportunity to do so.

Third Year or Graduate. In connection with the work of the third or graduate year advantage will be taken of the peculiar opportunities due to the location of the School in the City of New York. Every effort will be made to bring properly qualified students into close contact with modern business problems and with best business practice as developed in the large enterprises located in the city. Only the courses numbered above 100 may be taken for credit toward the Master's degree.

Secretarial Studies. Students in Secretarial Studies are required in the two years of the School of Business to take courses in business administration, business law, secretarial bookkeeping, secretarial correspondence, and typography, aggregating not less than 22 points, and electives from the School of Business to make not less than 30 points. In addition they must satisfy the Administrative Board that they have a mastery of stenography and typewriting, for which a maximum of 8 points academic credit will be allowed, making a total of 60 points.

Certificate in Secretarial Studies for College Graduates. College graduates who have been accepted as candidates for a certificate are required to take, during the year, the following courses, Stenography *ex-2*, Typewriting *ex-2* for which academic credit of 8 points will be granted, also elective courses in the School of Business or Extension Teaching amounting to 14 points. See Announcement of *Extension Teaching*.

Degrees. Students who complete the undergraduate work of the School of Business are eligible for the degree of Bachelor of Science in Business. Those who complete the work of the third or graduate year are eligible for the degree of Master of Science in Business; the program of study to be pursued in satisfaction of the requirements for the degrees is as follows:

Bachelor of Science. The work required for this degree consists of two years of college courses and a program of 60 points in the School of Business, each point rep-

representing the satisfactory completion of work requiring one hour a week for the Winter and Spring Session. This requirement in the School of Business must be satisfied by two years' residence, and is met for the first year by the prescribed program indicated above, and electives to make a total of not more than 36 points. The second year is entirely elective.

No candidate for the degree may take less than twelve nor more than nineteen hours per week in either the Winter or the Spring Session. Students registered in the School of Business may, on the approval of the Administrative Board, receive credit for courses successfully completed in the Summer Session or in Extension Teaching.

Master of Science. To satisfy the requirements for candidacy for this degree a student must have completed a preliminary education covering four years of study, two of which shall have been in collegiate subjects and two in the School of Business or the equivalent. To obtain the degree of Master of Science the candidate must register for and attend courses aggregating not less than 30 tuition points, distributed over a period of not less than one academic year or its equivalent. The candidate must satisfy the Administrative Board that he has completed all the requirements specified by it for the degree. These requirements may include the completion of courses and the assigned work in them, examinations, an essay, seminars, or other work prescribed by the department. The purpose of this graduate course is to enable the student to pursue his professional study beyond the two years required for the bachelor's degree; to secure an opportunity to elect courses under the Faculty of Political Science; and to carry on special work in research in applied economics. Courses offered by the Faculties of Law, Political Science, and Engineering are open to the candidates for the degree under restrictions determined by those Faculties and by the Administrative Board of the School of Business.

Candidacy for Degrees. Students intending to apply for degrees must, on or before the dates indicated in the academic calendar, pay the required fee and file with the Registrar the application for graduation.

Application for the bachelor's degree to be conferred in June, 1920, must be made on or before April 15, and for the master's degree before March 1.

Advanced Standing. Candidates for admission to advanced standing, upon the basis of certificates of transfer from other colleges should fill out the appropriate application blank, to be obtained from the Secretary of the University, and file it with the University Committee on Admissions before September 1 or January 1. Each candidate (whether he has a degree or not) must also present an official transcript of his academic record and a certificate of honorable dismissal together with a marked catalogue of the institution that he leaves, showing the courses he has there pursued, with grades received in each.

Special Lectures. From time to time special lectures will be given before the students of the School of Business by men prominent in the various fields of business. Detailed information in regard to these lectures will be announced later.

SCHOOL OF DENTISTRY

ADMINISTRATIVE BOARD (See page 10)

Delegate to the University Council (See page 6)

General Statement. In September, 1916, students in dentistry were admitted to courses in Columbia University at the College of Physicians and Surgeons. On March 5, 1917, the Trustees of Columbia University established a School of Dentistry as of September 27, 1916, so that the conduct of courses from that date, as forming part of the work of the School, might be officially recognized.

The courses in the School of Dentistry are based upon the same preliminary requirements as the study of medicine in Columbia University, and the entire course requires four years. Women may be admitted to the dental course on the same conditions as to the medical course.

Admission. The student must have completed two years of college study aggregating seventy-two points, as rated in Columbia College.

Requirements in the Sciences. Students who take their preliminary education in other colleges than Columbia must also elect as part of their course, physics, inorganic chemistry, organic chemistry, qualitative analysis, and general biology.

The courses in physics, chemistry, and biology which are required for admission are represented by the following courses in Columbia College:

Elementary Physics, including laboratory work, *Physics A1-A2*. At least three lectures and two hours' laboratory work a week for one year.

General inorganic chemistry, including laboratory work, one year, *Chemistry 3-4 organic chemistry, chemistry 41 and qualitative analysis chemistry 11*. At least two lectures and six hours' laboratory work a week for one-half year in qualitative analysis and three lectures and six hours' laboratory work per week for one-half year in organic chemistry.

Biology, including laboratory work, *Zoology 1-2*. At least two lectures and four hours' laboratory work a week for one year.

Application. Students should apply in the Spring, if possible, and may use Summer Session courses to make good deficiencies. All applications should be accompanied by the sum of twenty-five cents, to defray the cost of the dental student's certificate, which is required by the laws of the State.

Admission to Advanced Standing. In addition to the dental student's certificate mentioned above, based on at least two years of college work completed before beginning the study of dentistry, candidates who have completed, without conditions, one or two years of study in an accepted dental school will be given credit in the School of Dentistry for all courses satisfactorily completed therein, on presentation of proper certificates covering the same. Application blanks will be furnished on request, and prospective students are requested to file their applications early in June, when possible, to avoid delay in matriculating at the beginning of the session. *It is essential that students offering themselves for admission to advanced standing should have had before admission all the preliminary work presented in the curriculum of the School of Dentistry.*

Students will not be admitted to advanced standing upon examination, but only upon a satisfactory record from their schools of previous residence.

Combined Course, Columbia University. Combined course for the degrees of A.B. and D.D.S. The attention of students of dentistry who propose to enter the Columbia School of Dentistry is called to the program of studies in Columbia College, which offers an opportunity to the prospective dental student to take both a collegiate and a dental degree in six or seven years.

Requirements for Graduation. In addition to complying with the requirements for admission and to completing the required work of the curriculum, each candidate for the degree of D.D.S. must present satisfactory evidence, as required by law, of good moral character, and of having attained the age of twenty-one years. If the candidate shall have been admitted to advanced standing, he must have spent not less than four academic years (no two of which shall have begun during the same calendar year) in approved medical or dental colleges, in the study of the subjects making up the curriculum of the School of Dentistry.

Oral Hygiene. Under the Department of Extension Teaching, Columbia University conducts courses in oral hygiene at the Vanderbilt Clinic. These courses are intended for women who desire to become licensed dental hygienists. The requirements for admission are the qualifying certificate obtained from the Department of Education of the State of New York at Albany, New York, the completion of at least one year of high school work, and the attainment of at least nineteen years of age.

Advanced Courses in Dentistry. Advanced courses in dentistry for practitioners are offered by the Department of Extension Teaching in the laboratory and infirmary at 437 West 59th Street. These courses cover the subjects of operative and prosthetic dentistry, plate prosthesis, periodontia, and dental ceramics, and vary in length from five to eleven weeks, according to the requirements of the subject.

¹ In 1915-1916 candidates for the degree of Master of Arts whose subject of major interest was Education (654) were, for the first time, included only under the Faculty of Education. In 1916-1917 all students engaged in graduate study with Education as their subject of major interest were counted under the Faculty of Education only.

² Including, prior to 1912-1913, those here classified under the School of Practical Arts.

³ In 1914 the School of Music was discontinued.

⁴ Students in Teachers College enrolled in the non-professional graduate faculties as candidates for the higher degrees and students who graduated from Columbia College in February and entered a graduate or professional faculty at that time.

⁵ Excluding Summer Session students who returned for work in the succeeding fall. The Summer Session falls at the beginning of the year, as here reported. The first session was in the Summer of 1900, the last included here is that of 1918. A detailed report of the Summer Session of 1919 is appended.

EXTENSION TEACHING

General Statement. The Statutes of the University define Extension Teaching as instruction given by University officers and under the administrative supervision and control of the University, either away from the University buildings or at the University, for the benefit of students unable to attend the regular courses of instruction.

Students. Courses in Extension Teaching are planned for two classes of students: (1) men and women who can give only a portion of their time to study and who desire to pursue subjects included in a liberal education of the character and grade of a college or professional school, but without any reference to an academic degree; (2) those who look forward to qualifying themselves to obtain in the future academic recognition involving acceptance of the work which they may satisfactorily complete in Extension Teaching.

Courses of Instruction. Under the direction of the University Council courses are offered in Extension Teaching which count toward the degree of Master of Arts and Doctor of Philosophy.

Regular courses of instruction are offered in Extension Teaching which, in many instances, are coordinated so as to form at least the first years of collegiate and professional work, thus providing in the evening at Morningside Heights and elsewhere, courses in subjects which are generally offered in the freshman, sophomore, and junior years of college, so that students may qualify themselves for admission with advanced standing to Columbia College and Barnard College or other institutions, as candidates for the degrees of Bachelor of Arts and Bachelor of Science.

There are also offered at Morningside Heights in the evening subjects which are required of students in the Schools of Mines, Engineering, and Chemistry, so that a student may pursue some special line of scientific study or prepare himself for advanced study in these schools. Courses in these schools are open only to those who have had a preliminary course of three years in Columbia College or the equivalent. This preliminary collegiate course may be taken in part or in full in Extension Teaching in the evening by students engaged in business during the day.

Evening courses are offered in architecture leading to a certificate at Morningside Heights, which correspond to the courses of the Columbia University School of Architecture.

Evening courses in business, forming a three-year course leading to a certificate and preparing for the State examination for the certificate of Certified Public Accountant, are given at Morningside Heights.

A series of courses intended to equip students for the position of private secretary is also offered. The completion of these courses requires two years for high school graduates and at least one year for college graduates. A complete series of courses in library economy are given for the purpose of training high school and college graduates for positions as library assistants. A circular stating the requirements for students in this course will be mailed upon request.

Many courses are offered which aid a student to prepare for the Schools of Business, Law, and Medicine or to complete his preparation for Columbia College.

A two-year course in practical optics is offered in cooperation with the Department of Physics for the special training of those who expect to become optometrists.

Teachers College offers in cooperation with the Department of Extension Teaching about 130 technical courses in the various fields of Practical Arts: *i. e.*, household arts, fine arts, industrial arts, music, physical training, and nursing and health. In many

of the courses the instruction is the same as that given in the regular classes of the School of Practical Arts. In other cases, special classes are organized to meet the needs of those desiring instruction in Practical Arts for use in the home.

Courses are offered in agriculture for those who desire special work in that subject.

Under the Extension Teaching Department are offered also a number of classes in dentistry. These include graduate courses for practitioners, intended for graduates of reputable dental institutions. They are given at 59 Street and Tenth Avenue. In addition, classes in oral hygiene for licensed dental hygienists, designed to train women for the practice of operative dental hygiene, are offered at the Vanderbilt Clinic, 59 Street and Tenth Avenue.

A large number of other courses in varied subjects is given late in the afternoon and on Saturday, which repeat those in liberal studies offered in the Colleges of the University. These are given in the same manner and often by the same instructors as the regular courses. In most instances university credit is granted.

Courses covering the first two years of collegiate study and supplying the premedical years of the Long Island College Hospital are given at that institution.

Numerous courses are given at various centers. These are either regular courses of collegiate grade or short lecture courses without academic credit.

Lecture-study courses in certain subjects forming fifteen or thirty lectures alternating with quiz or conference hours are given at Morningside Heights and at centers when requested.

Centers for the study of choral music are maintained at Morningside Heights, and Brooklyn, and choral concerts are given during the year. The Department of Extension Teaching also maintains the Institute of Arts and Sciences.

Registration. Students who expect to attend at Morningside Heights are required to register at the office of the Registrar, University Hall. A student in Extension Teaching registers for one session and is required to renew his registration in person at the beginning of the Spring session.

Matriculated students in the various schools of the University will be allowed to attend courses in Extension Teaching in accordance with the regulations of the several schools; they must, however, register and pay the fees in the same way as other students in Extension courses.

Fees. All students, matriculated or non-matriculated, admitted to Extension courses, must pay at the time of registration the fees determined by the Administrative Board. The fees for Extension courses are determined, as a rule, at the rate of \$6 per point, *i. e.*, for one hour per week of class-room work, or two hours of laboratory or drawing-room work, through one session. All Extension students must pay a University fee of \$5 for each year or any part thereof. Students taking six points each session have the privileges of the Library and, in the case of men, the University Gymnasium.

Dormitories. The privilege of residence in the dormitories is limited in the case of Extension Teaching men to students in good standing pursuing programs aggregating not less than eight points each session. Women students in Extension Teaching may reside in Whittier Hall or Furnald Hall under certain conditions determined by the amount of work taken.

Courses in Extension Teaching, approved by the Committee on Instruction in Columbia, Barnard, and Teachers Colleges are credited for matriculated students toward the degrees of A.B. and B.S., toward the diplomas in Teachers College, and toward degrees in other professional schools in accordance with the regulations established by the various faculties. The credit given for the various courses will be found in the *Announcement of Extension Teaching*.

Courses in Extension Teaching, approved by the Executive Committee of the University Council, will count toward the degree of Master of Arts and Doctor of Philosophy.

Admission. No examination is required for admission to courses offered in Extension Teaching, but students must satisfy the instructors concerned that they can pursue the courses with advantage. It is expected that prospective students in all collegiate and professional courses shall have had a full secondary school education. The courses are open, unless it is otherwise stated, both to men and women.

Location. Intramural collegiate and professional courses are given at Columbia University. Extramural courses are given at the Long Island College Hospital, Henry and Amity Streets, Brooklyn, at Scranton, Bridgeport, Trenton, Yonkers, and at centers where there may be sufficient demand. Classes will also be conducted at the New York Chapter of the American Institute of Banking, 138 East 35 Street.

For detailed information as to the places and hours for these courses, the qualifications for admission, the regulations for registration, candidacy for degrees, diplomas, attendance, and examinations, the fees prescribed, and for a statement of each course offered, see the current *Announcement of Extension Teaching* and the circular of Extramural Courses, which may be obtained without charge upon application to the Secretary of the University.

Institute of Arts and Sciences. The Institute of Arts and Sciences is the non-academic division of the Department of Extension Teaching. The aim of the Institute is to provide a popular late afternoon and evening program consisting of general lectures and events of a cultural nature.

The program is planned for busy men and women. The scope includes lectures, given singly or in series of six, on history, literature, art, music, household arts, science, and on current economic and social problems; it comprises also illustrated travel lectures, recitals, dramatic recitals, and vocal and instrumental as well as chamber music concerts.

The program is subscribed for as a whole. The annual dues are \$15 payable in advance, with an enrolment fee of \$5 payable only once provided the enrolment does not lapse.

A member of the Institute is entitled to admission for himself and one other person to all the lectures and other events on the regular evening program, but in the afternoon only one person is admitted. The ticket is transferable. Altogether, the membership ticket includes admission to approximately 250 lectures, readings, concerts, recitals, etc., throughout the season. The program continues from October to April. The University auditoriums are used. Memberships are accepted at any time and are good for one calendar year from the first of the month nearest the time of enrolment.

A special pamphlet describing in detail the program of the Institute will be mailed upon request.

FELLOWSHIPS, SCHOLARSHIPS, AND OTHER PROVISION FOR THE ASSISTANCE AND REWARD OF STUDENTS

(For Awards see page 304)

NOTE: Unless otherwise provided, all stipends of Fellows and Scholars are paid in equal semi-annual instalments on the second Wednesday of each Winter and Spring Session. Before being entitled to receive the instalment of his stipend, each Fellow and Scholar is required to report himself in writing to the Registrar, as in residence, on or before the opening day of each Session. Failure so to report may operate to vacate the fellowship or scholarship.

Fellows and Scholars are required to pay the University, tuition, and degree fees, as they are prescribed by the Statutes.

GENERAL REGULATIONS

The following regulations apply, unless the contrary is specifically stated, to the award of all fellowships and scholarships:

In each case application in writing, on a blank prepared for the purpose, must be filed with the Secretary of the University; for fellowships and University scholarships on or before March 1, for other scholarships on or before May 1. Applications and documents received in support thereof later than these dates, or not distinctly indicating the name of the candidate and the fellowship or scholarship for which he applies, may fail of consideration. As an evidence of graduation, a printed certificate is preferable to the formal diploma itself, as there is risk that the latter may be lost or injured in transit.

The appointment is in each case for one year dating from July 1. The Fellowship or Scholarship is not available for the Summer Session or in Extension Teaching. Candidates will be notified as promptly as possible as to the success of their applications. If the applicant wishes the documents which he has submitted returned to him by mail he should enclose postage for the purpose, otherwise they will be held until called for. Documents will not be preserved for more than one year from the date of application.

All Fellows and Scholars, except as hereinafter provided, shall reside in New York City or its vicinity during the academic year, unless permission be granted to study elsewhere. No Fellow or University Scholar may pursue a professional or technical course of study during his term.

The conditions under which the appointment may be granted are indicated in the following paragraphs.

UNIVERSITY FELLOWSHIPS

Twelve fellowships, known as 'University Fellowships,' of the value of \$500, and in addition thereto the sum of \$150, or so much thereof as is necessary to pay the University and tuition fees, are awarded annually by the University Council at its stated meeting in April, to those graduates of colleges and scientific schools, not over thirty years of age, who show themselves especially fitted to pursue courses of higher study and original investigation. The candidate must give evidence:

- (a) Of a liberal education, such as a diploma from a college or scientific school of good repute;
- (b) Of decided fitness for a special line of study, such as an example of some scientific or literary work already performed;
- (c) Of upright character, such as a testimonial from some instructor.

A Fellow may be reappointed for reasons of weight, but not for more than one term of one year. Vacancies will be filled in the same manner in which original appointments are made.

These fellowships are awarded as honors, and those who are disposed, for the benefit of others or for any other reason, to waive the pecuniary emolument, may do so, and still have their names retained on the list of Fellows. In such cases additional University Fellows may be appointed. Each Fellow is expected to perform such duties as may be allotted to him in connection with a course of study leading to the degree of Doctor of Philosophy. He is expected to devote his time to the prosecution of special studies under the direction of the department of his major interest, and before the close of the academic year to give evidence of progress by the preparation of a thesis, the completion of a research, the delivery of a lecture, or by some other approved method. No Fellow shall be allowed to accept remunerative employment or to give instruction or assistance in any department of the University except by permission of the President, and the acceptance of any such employment, without such permission, shall operate to vacate the fellowship.

Unless otherwise specified, the regulations as to the mode of application for the following fellowships, and the conditions governing their award and tenure, are the same as those for University Fellowships. Candidates should indicate clearly upon their application blanks the fellowship for which they are applicants.

ALUMNI FEDERATION OF COLUMBIA UNIVERSITY

(Incorporated 1916)

The purposes of the Alumni Federation are to advance the interests and promote the welfare of Columbia University and its alumni. This it endeavors to accomplish by encouraging and assisting efficient organization of alumni bodies; by forming new associations and clubs; by disseminating among alumni and the general public through an official publication or otherwise accurate information about alumni and University affairs; by providing a recognized channel of communication between students, alumni, and University officers; by keeping the alumni informed with respect to undergraduate life and activities, and by providing the machinery to nominate alumni trustees.

All members of the alumni associations of the various schools maintained by the Trustees of the University are *ipso facto* School Members of the Federation and any alumnus may become a General Member. A payment of \$100, or a multiple thereof, toward the Endowment Fund entitles an alumnus to be an Endowment Member, which carries life privileges and a life subscription to the *Alumni News*. The following are Endowment Members:

Benjamin B. Lawrence, '78 Mines	John C. Richardson, '83 Mines
William Fellowes Morgan, '80, '84 Mines	George F. Butterworth, '74
Henry Kraemer, '95 Mines	A. M. Huntington, '08 Hon.
Nicholas Murray Butler, '82	Norton Perkins, '01L
Willard V. King, '89	Herbert L. Satterlee, '83
Charles F. Hoffman, '78	F. L. Stetson, '69L
Gano Dunn, '91 Mines	Edmund E. Wise, '83

There is a special class of Endowment Membership which provides for additions to the Endowment Fund of \$500 or over by individuals. An alumnus thus contributing is named a 'fundor'. There is one Fundor—Charles Elihu Slocum, '69 P. and S.—and his contribution to the Endowment Fund is known as 'The Charles Elihu Slocum, '69 P. and S. Alumni Federation Fund of Five Hundred Dollars'. A class may become a 'Fundor' upon payment of \$250. The Class of 1905 assigned to the Federation the income for one year of its Decennial Fund and was the first class to become a Fundor.

The Federation sets in motion the machinery which places in nomination before the University Trustees the candidates for alumni trusteeship.
